Figure 1. Showcase of UniMAGE’s multimodal directing abilities. UniMAGE unifies script drafting, extension, continuation, and keyframe image generation, enabling coherent long-form storytelling with consistent characters and cinematic visual compositions.

Abstract

Existing AI-driven video creation systems typically treat script drafting and key-shot design as two disjoint tasks: the former relies on large language models, while the latter depends on image generation models. We argue that these two tasks should be unified within a single framework, as logical reasoning and imaginative thinking are both fundamental qualities of a film director. In this work, we propose UniMAGE, a unified director model that bridges user prompts with well-structured scripts, thereby empowering non-experts to produce long-context, multi-shot films by leveraging existing audio–video generation models. To achieve this, we employ the Mixture-of-Transformers architecture that unifies text and image generation. To further enhance

narrative logic and keyframe consistency, we introduce a “first interleaving, then disentangling” training paradigm. Specifically, we first perform Interleaved Concept Learning, which utilizes interleaved text–image data to foster the model’s deeper understanding and imaginative interpretation of scripts. We then conduct Disentangled Expert Learning, which decouples script writing from keyframe generation, enabling greater flexibility and creativity in storytelling. Extensive experiments demonstrate that UniMAGE achieves state-of-the-art performance among open-source models, generating logically coherent scripts and visually consistent keyframe images.

1. Introduction

“A writer needs a pen, an artist needs a brush, but a filmmaker needs an army.” — Orson Welles

Audio-video generation has advanced rapidly in recent years, with models such as Veo 3 (DeepMind, 2025b) and Sora 2 (OpenAI, 2025) demonstrating remarkable creative potential and inspiring users across online communities. However, these models primarily focus on visual fidelity and

¹ByteDance Intelligent Creation ²Nanyang Technological University. Correspondence to: Guosheng Lin <gslin@ntu.edu.sg>, Xin Chen <chris.chenxin.tech@gmail.com>.

temporal coherence within short, single-shot videos, which limits their ability to convey long-form narratives. To address this limitation, recent approaches (Long et al., 2024; Wu et al., 2025; Huang et al., 2025) have begun to employ large language models (LLMs) and image generation models as collaborative agents that align user prompts with multi-shot video captions and generate key images for each shot, thereby facilitating film-level video generation. Nevertheless, these methods typically treat script drafting and keyframe generation as two disjoint tasks, resulting in limited narrative logic and visual consistency.

In traditional filmmaking, scriptwriting and storyboard design are inseparable processes that require an experienced director to systematically plan both the overall narrative and the visual composition. A film director functions much like a conductor in an orchestra, bringing out the strengths of each element while maintaining overall harmony. Inspired by this analogy, we posit that a unified understanding and generation model is essential to bridge user intents with audio-video generation systems, rather than relying on separate agents. Accordingly, in this work, we present a unified director model named UniMAGE.

UniMAGE is built upon the Mixture-of-Transformers (MoT) architecture proposed in Bagel (Deng et al., 2025), which integrates an LLM and a diffusion model within a single transformer framework, enabling joint reasoning and generative learning across text and image modalities. Although MoT provides a strong, unified architecture, UniMAGE faces a more challenging task than previous multimodal systems, as film scripts inherently involve lengthy, context-rich sequences and intricate dramatic logic.

On the one hand, maintaining image consistency across long-context sequences is extremely challenging. Previous studies (Zhou et al., 2024b; Dinkevich et al., 2025; Xie et al., 2024) mainly focused on preserving a single subject across frames or conducting limited-step image editing. However, when scripts involve multiple actors, existing models struggle to reliably recognize and maintain individual identities. UniMAGE addresses this issue through *Interleaved Concept Learning*. Specifically, we organize the script and corresponding keyframes into a text-image interleaved format and jointly optimize the parameters of the LLM and diffusion transformer. This interleaved representation enables the model to capture the overall narrative concept. To further enhance image consistency, we introduce *In-Context ID Prompting* strategy, which inserts special tokens among the reference ViT and VAE tokens to indicate the indices of generated keyframes and character identities, thereby enabling stable multi-subject appearances across long sequences.

On the other hand, ensuring coherent script logic and supporting flexible continuation remain highly demanding. Previous studies (Huang et al., 2025; Wu et al., 2025; Long

et al., 2024) mainly relied on prompting a pre-trained LLM to generate scripts, which requires per-sample prompt engineering and often overlooks reasonable storyboard design, making it difficult to preserve logical coherence and temporal alignment in multi-scene storytelling. UniMAGE overcomes this limitation through *Disentangled Expert Learning*. Specifically, we maintain keyframe generation in an interleaved format but freeze the LLM parameters when optimizing the diffusion loss, and decouple the script-writing process by training the LLM as a dedicated script expert. To further support flexible script continuation, we employ the *Pre-Context Script Splitting* strategy, which randomly divides complete scripts so that the model learns to continue script generation based on the preceding context or a given user prompt, thereby ensuring logically coherent and adaptable narrative development.

Our contributions are summarized as follows:

Concept: UniMAGE embodies the concept of a “unified director model” that holistically orchestrates narrative logic and visual composition, bridging user intent with multimodal script for creative audio-video generation.

Technique: UniMAGE employs Interleaved Concept Learning and Disentangled Expert Learning, with In-Context ID Prompting and Pre-Context Script Splitting, to enhance visual consistency and narrative coherence across long-context sequences.

Performance: UniMAGE demonstrates strong generalization in long-form, multi-scene script generation, achieving superior narrative coherence, character stability, and image consistency compared with existing agent-based models.

2. Related Work

Generative Models for Film Production. Recent works (Huang et al., 2025; Xiao et al., 2025; Shi et al., 2025; Cheng et al., 2024; Mao et al., 2024) combine the reasoning and planning abilities of LLMs with diffusion-based image generation to support AI-assisted filmmaking. For script creation, Anim-Director (Li et al., 2024) expands prompts into structured scripts using an LLM, while FilmAgent (Xu et al., 2025) simulates a director’s workflow in 3D environments, spanning ideation, scriptwriting, and cinematography. MovieAgent (Wu et al., 2025) further applies a multi-agent Chain-of-Thought framework to automate script decomposition, scene planning, and shot design.

For keyframe generation, StoryDiffusion (Zhou et al., 2024b) introduces an attention module to enforce character consistency across image sequences, and Story2Board (Dinkevich et al., 2025) preserves generative priors via a lightweight consistency mechanism. FilMaster (Huang et al., 2025) provides a comprehensive system guided by

cinematic principles to control camera language and rhythm. However, these methods typically decouple script reasoning from visual synthesis, resulting in weak narrative–visual alignment and limited long-range coherence. Although SEED-Story (Yang et al., 2025) employs a unified MLLM for multimodal storytelling, its performance is largely constrained by overfitting. In contrast, UniMAGE jointly performs script reasoning and visual generation within a unified MoT architecture, enabling end-to-end learning of coherent narratives and high-quality visual composition.

Unified Multimodal Generation. Existing methods unify multimodal understanding and visual generation mainly through two paradigms. Auto-regressive (AR) models, such as Emu (Wang et al., 2024) and Chameleon (Team, 2024), jointly generate text and image tokens by treating images as visual tokens, but typically yield lower image quality than diffusion-based methods. Alternatively, diffusion-enhanced models integrate diffusion modules into LLMs, as in Show-O (Xie et al., 2024) and TransFusion (Zhou et al., 2024a), enabling joint text–image synthesis within a shared transformer. Bagel (Deng et al., 2025) further proposes a Mixture-of-Transformers architecture to activate modality-specific parameters while supporting long-context multimodal interaction via shared self-attention. However, existing unified models remain limited to short-context generation and fail to maintain long-range narrative and visual coherence. Building on the MoT, UniMAGE jointly models narrative structure and visual composition, enabling coherent long-form script and keyframe generation.

Audio-Video Generation. Early methods (e.g., MM-Diffusion (Ruan et al., 2023)) model audio and video separately. Subsequent works (e.g., SyncFlow (Liu et al., 2024), Uniform (Zhao et al., 2025), and UniVerse-1 (Wang et al., 2025)) scale training data to improve alignment and generalization. Commercial systems (e.g., Veo 3 (DeepMind, 2025b) and Sora 2 (OpenAI, 2025)) further enhance synchronization but rely heavily on structured prompts (Gao et al., 2025) and are limited to short, single-shot generation. In contrast, UniMAGE acts as a unified director model, enabling long-context, film-like audio–video generation through multimodal script reasoning.

3. Method

We introduce UniMAGE, a unified director model that transforms simple user prompts into illustrated scripts. Given a user prompt ρ , the overall pipeline can be formulated as:

$$\text{UniMAGE}(\rho, \hat{S}) \mapsto (\mathcal{G}, \mathcal{C}, \mathcal{F}), \quad (1)$$

where $\mathcal{G}$ denotes the global descriptions, such as character and environment definitions; $\mathcal{C} = (c_1, c_2, \dots, c_n)$ represents the content descriptions for n video shots, including keyframe and video-level narratives; and $\mathcal{F} = (f_1, f_2, \dots, f_n)$ corresponds to the keyframe images for those shots. The full script is defined as $S = (\mathcal{G}, \mathcal{C}, \mathcal{F})$, and the superscript $\hat{S}$ indicates that the input is optional. $\hat{S}$ is used for script extension and continuation. Through this formulation, UniMAGE uniformly performs script creation, prompt-based or in-context script continuation, and keyframe generation, thereby empowering automatic video–audio creation.

Mixture-of-Transformers (MoT). UniMAGE adopts the MoT architecture, consisting of two transformer experts: one for multimodal understanding and another for image generation. Correspondingly, it uses two types of visual encoders, an understanding-oriented encoder (ViT), and a generation-oriented encoder (VAE). Both transformer experts process the same token sequence through shared self-attention layers (please see the supplementary material for more details). For text token prediction, UniMAGE follows the Next Token Prediction paradigm (Minaee et al., 2024), leveraging the established advantages of autoregressive modeling. For visual token prediction, it utilizes the Rectified Flow (Esser et al., 2024), aligning with prevailing practices in visual generation.

3.1. Preliminaries

Next Token Prediction (NTP) serves as the fundamental training objective for auto-regressive models (Minaee et al., 2024). Given a token sequence $\mathbf{y} = (y_1, y_2, \dots, y_n)$, where each token y_t is drawn from a fixed vocabulary V , and assuming $\mathbf{y}$ follows a data distribution $P(\mathbf{y})$, the auto-regressive model P_θ decomposes the joint probability as: $P_\theta(\mathbf{y}) = \prod_{t=1}^T p_\theta(y_t \mid \mathbf{y}_{<t})$, where $\mathbf{y}_{<t} = (y_1, y_2, \dots, y_{t-1})$ denotes the sequence of tokens preceding position t . The model parameters θ are optimized to maximize the likelihood of the true token at each step, conditioned on its ground-truth history from the training dataset. Formally, the maximum likelihood estimation of θ can be expressed as:

$$\theta^* = \arg \max_{\theta} \sum_{t=1}^T \log p_\theta(y_t \mid \mathbf{y}_{<t}). \quad (2)$$

During inference, the model generates tokens sequentially by either sampling or selecting the most probable token, conditioned on a given or learned context.

Figure 3. **Illustrations of Interleaved Concept Learning and Disentangled Expert Learning.** To enhance visual consistency and logical coherence across long-context scripts, we first optimize all MoT parameters using interleaved text–image data, and then disentangle the training of the understanding and generation experts—using pure text scripts for the former and text–image data for the latter.

Rectified Flow is an ordinary differential equation (ODE) model that transports samples from π_0 to π_1 along straight trajectories (Liu et al., 2022). Given two samples $X_0 \sim \pi_0$ and $X_1 \sim \pi_1$, the drift field v is trained to approximate their difference through the following objective:

$$\min_{\phi} \int_0^1 \mathbb{E} [\|(X_1 - X_0) - v_{\phi}(X_t, t)\|^2] dt, \quad (3)$$

where $X_t = (1 - t)X_0 + tX_1$. In practice, v_{ϕ} is parameterized by a neural network, and samples from π_1 are obtained by integrating the straight-flow ODE with a few steps.

3.2. Script Structure

As illustrated in Figure 2, the UniMAGE script consists of global descriptions $\mathcal{G}$, content descriptions $\mathcal{C}$, keyframe images $\mathcal{F}$, and a user prompt ρ . We introduce special tokens to represent script elements, including $\langle \text{User} \rangle$, $\langle \text{Character}N \rangle$, $\langle \text{Environment}N \rangle$, $\langle \text{Frame}N \rangle$, and $\langle \text{Video}N \rangle$, where N denotes the index. When a character or environment defined in the global description appears in the content description, the corresponding token marks its occurrence, e.g., “On the deck of the grand ocean liner $\langle \text{Environment}1 \rangle$, a young man $\langle \text{Character}2 \rangle$...”. These tokens enable accurate identification of characters and environments while maintaining a concise and consistent script structure.

The content descriptions are divided into two complementary layers. Frame descriptions capture static visual layouts, such as camera position, lighting, and character placement, while video descriptions focus on temporal and narrative aspects, including dialogue, plot progression, and actions. We further introduce indicator symbols $\langle - \rangle$ to denote character dialogue and environmental sounds, enabling easy retrieval of corresponding audio content in later stages, e.g., “ $\langle - \rangle$ Now close your eyes. Go on. $\langle - \rangle$ ”. To support diverse user inputs, we define four user prompt styles that are randomly sampled during training, with detailed definitions provided in the supplementary materials.

3.3. Interleaved Concept Learning

We initialize the MoT model of UniMAGE with Bagel (Deng et al., 2025), which provide a strong foundational capability for unified multimodal understanding and generation. However, unlike Bagel’s training format, which focuses on multi-step image editing, UniMAGE is required to generate not only images but also script text conditioned on the understanding of preceding narratives. Moreover, the long-context nature of script data further exceeds the base model’s capacity, necessitating *Interleaved Concept Learning* strategy for coherent narrative and visual generation.

With the script structure defined above, the script can be organized as interleaved text–image data. As illustrated in the left part of Figure 3, we first perform Interleaved Concept Learning, which enables the MoT model to generate text and images in an interleaved manner, thereby facilitating a deeper understanding of lengthy, context-rich scripts. This training stage is conceptually similar to the Chain-of-Thought strategy (Wei et al., 2022; Fang et al., 2025), where the text content functions as the model’s reasoning process, followed by image generation conditioned on the preceding narrative context. In this stage, all parameters of the two transformer experts are jointly optimized, allowing the generated results to influence the model’s textual understanding and vice versa. Nevertheless, scripts often involve multiple characters and scenes, making it highly challenging to consistently maintain the identities and visual coherence of different entities across long sequences. To address this, we propose *In-Context ID Prompting* as follows.

In-Context ID Prompting. The core of addressing the visual consistency problem lies in enabling the model to recognize the characters and scenes depicted in each image and associate them with the global text descriptions and historical keyframes. Given that text tokens and image tokens are aligned within the pre-trained unified architecture, we can leverage the text to prompt and highlight key information represented in the images, thereby facili-

Figure 4. Illustrations of In-Context ID Prompting and Pre-Context Script Splitting. The former ensures visual consistency by aligning image content with global descriptions, and the latter allows adaptive narrative extension and continuation.

tating long-form visual consistency. As illustrated in the left part of Figure 4, within the ViT tokens used for understanding and the VAE tokens used for image reference, we insert special text tokens to indicate the frame ID, as well as the character and environment IDs appearing in each image. We apply full attention between each image’s ViT or VAE tokens and its corresponding special tokens. This In-Context ID Prompting strategy, together with the special tokens defined in our script structure, effectively preserves long-range associations between the script text and the generated images, ensuring consistent visual identity and scene continuity throughout the narrative.

3.4. Disentangled Expert Learning

The Interleaved Concept Learning stage equips UniIMAGE with a holistic and coherent understanding of the overall script. However, this interleaved generation strategy inevitably constrains the model’s flexibility in content creation, particularly for tasks such as script extension and continuation, where the model must dynamically adapt to new user prompts or seamlessly expand upon existing narrative contexts. In addition, obtaining logically consistent multi-shot text-image data is inherently difficult, which limits the model’s ability to fully learn long-form narrative logic from interleaved data. Consequently, we introduce *Disentangled Expert Learning* strategy.

As illustrated in the right part of Figure 3, in this training stage, we decouple script content generation from interleaved keyframe generation and optimize the understanding transformer expert using pure text scripts. Meanwhile, the generation transformer expert is further optimized using interleaved text-image data, with the understanding branch frozen via stop-gradient. In addition, we incorporate text-image pairs into the training process to further improve visual fidelity. Through this strategy, both script logic and image quality are effectively enhanced, as the model can fully exploit heterogeneous multimodal training data beyond the interleaved script data. Finally, to enable script extension and continuation, we introduce the *Pre-Context Script Splitting* strategy, described as follows.

Pre-Context Script Splitting. Based on the pure text

scripts, we randomly insert new user or system prompts to simulate two types of creative demands. The first is prompt-based script extension, as illustrated in the middle part of Figure 4. Specifically, we divide a complete script into two parts and insert the indicator token `<Extension>`, followed by a new user prompt within the script, allowing the model to learn how to extend an existing narrative coherently from a given prompt. The new user prompt is generated by summarizing the second part of the script using Qwen 2.5 (Hui et al., 2024). The second is in-context script continuation, as shown in the right part of Figure 4. In this case, we insert the indicator token `<Continuation>`, followed by a system prompt before the last shot of the script, enabling the model to infinitely continue the script during inference.

3.5. Inference of UniIMAGE

During inference, we maintain the disentangled generation process for text and images. Specifically, UniIMAGE first generates a multi-shot text script conditioned on the user prompt. The user can then extend the narrative with new prompts or continuously generate subsequent shots based on the previously generated content. Finally, the complete script is segmented into individual shots, and corresponding keyframe images are generated in an interleaved manner. This unified yet disentangled strategy—where a single model handles both modalities while separating the generation processes for text and image—effectively ensures the logical coherence of the script and the visual consistency of the generated images. As a result, UniIMAGE can produce longer, more coherent narratives while mitigating issues such as plot repetition and image distortion.

4. Experiments

Datasets. We construct a comprehensive dataset for training UniIMAGE, consisting of three components: (1) multi-shot text-image scripts (450k sequences) derived from multi-shot videos and captioned by Gemini 2.5 Pro (DeepMind, 2025a), which support multimodal reasoning and generation; (2) multi-shot text scripts (250k sequences) reorganized from textual scripts using Qwen 2.5 (Hui et al., 2024), facilitating long-form narrative generation; and (3) single-

Figure 5. Comparison with the baselines for multi-character script generation. UniMAGE demonstrates a superior ability to maintain consistent character identities and visual coherence across multiple shots, whereas the baseline methods fail to preserve such consistency.

shot text-image pairs (250k samples) obtained from images re-captioned by Gemini 2.5 Pro (DeepMind, 2025a), enhancing image quality. The dataset covers both Chinese and English. Further details on dataset construction are provided in the supplementary material.

Implementation details. We implement UniMAGE on the open-source BAGEL framework (Deng et al., 2025) and conduct experiments on 64 NVIDIA A100 GPUs. During Interleaved Concept Learning, only multi-shot text-image script data is used, with a learning rate of 1e-5 for 30,000 steps. During Disentangled Expert Learning, the full dataset is used with the same learning rate for 10,000 steps. In this stage, pure textual samples optimize the understanding branch, while text tokens are detached when optimizing the generation branch to prevent gradient propagation and enforce disentangled learning.

Evaluation metrics. We conduct qualitative and quantitative evaluations to demonstrate the effectiveness of UniMAGE. Quantitative results are reported on the public benchmark ViStoryBench-V3¹ (Zhuang et al., 2025), which evaluates story visualization models across diverse narrative structures, visual styles, and character settings. We report six metrics: Style Similarity (CSD), Character Identification Similarity (CIDS), Prompt Adherence (Alignment), On-stage Character Count Matching (OCCM), Image Quality (Inception), and Aesthetics.

¹ViStoryBench-V4 differs from V3 in metric computation.

4.1. Qualitative Results

We compare UniMAGE with recent script visualization methods, including StoryDiffusion (Zhou et al., 2024b) and Story2Board (Dinkevich et al., 2025), as well as the multi-modal script generation model SEED-Story (Yang et al., 2025). The textual scripts used for StoryDiffusion and Story2Board are generated by UniMAGE. More results are presented in the supplementary materials.

Multi-character script generation. Figure 5 compares UniMAGE with baseline methods on multi-character script generation. Baseline models fail to maintain consistent character identities, especially across multiple shots. When scenes change, they produce mismatched or unstable character appearances. In contrast, thanks to its unified director architecture and In-Context ID Prompting, UniMAGE accurately identifies characters in each shot and preserves consistent visual identities throughout the sequence.

Long-form script generation. Figure 6 compares UniMAGE with baseline methods on long-form script generation. Although StoryDiffusion preserves character consistency, it lacks scene diversity, leading to weak narrative flow and repetitive character artifacts. Story2Board and SEED-Story fail to maintain consistent visual styles and character appearances, resulting in fragmented storytelling. In contrast, UniMAGE captures long-range temporal structure and follows plot progression with higher fidelity, enabling more coherent, diverse, and cinematic long-form narratives.

Figure 6. Comparison with the baselines for long-form script generation. UniIMAGE exhibits markedly enhanced visual coherence, narrative consistency, and scene diversity across long story sequences, whereas the baselines are limited in these qualities.

Figure 7. Comparison with SEED-Story on multimodal script generation. UniIMAGE demonstrates superior logical coherence, visual quality, and cross-domain generalization, reflecting its stronger capability in unified multimodal understanding and generation.

Multimodal script generation (vs. SEED-Story). Although SEED-Story supports unified multimodal script generation, it is trained on only three animation datasets and lacks generalization capability. Consequently, its generated plots often show weak logical coherence, and the image quality is subpar (see Figure 7). In contrast, UniIMAGE produces vivid, logically consistent scripts and high-quality keyframe images, while generalizing effectively across diverse storytelling styles and visual domains.

Ablation study for In-Context ID Prompting. Figure 8 shows the ablation results of the In-Context ID Prompting strategy. This strategy allows UniIMAGE to maintain consistent character identities across multiple shots and long-form sequences. Without it, character representations become confused during frequent camera cuts and extended temporal spans, as highlighted by the red circles.

Ablation study for Pre-Context Script Splitting. As shown in the bottom part of Figure 8, the Pre-Context Script

Splitting strategy in the Disentangled Expert Learning stage enables UniIMAGE to flexibly extend and continue scripts. In contrast, the interleaved text generation approach often produces repetitive content and weak narrative coherence.

4.2. Quantitative Results

Table 1 reports quantitative and ablation results comparing UniIMAGE with baseline methods. UniIMAGE achieves state-of-the-art performance in character consistency (CIDS and OCCM) and prompt alignment, surpassing prior methods by a large margin. While its image quality (Inception and Aesthetics) is slightly lower than that of expert image generation models, UniIMAGE tackles a more challenging task by jointly producing consistent keyframe images and coherent scripts, whereas most baselines, except SEED-Story, lack script generation capability. Moreover, SEED-Story’s CSD advantage arises from overfitting to specific styles, limiting its general applicability, as shown in Figure 7.

Figure 8. Ablation experiments. In-Context ID Prompting contributes to preserving consistent multi-character identities across multi-shot and long-form sequences; the red circles mark failure cases without it. Pre-Context Script Splitting ensures coherent and flexible script extension and continuation; the red box highlights content repetition issues when it is absent.

Table 1. Quantitative comparisons and ablative results on ViStoryBench (V3). Best results are bolded. UniMAGE achieves superior performance in consistency-related metrics and alignment.

Methods	CSD ^{self} ↑	CIDS ^{self} ↑	Alignment↑	OCCM↑	Inception↑	Aesthetics↑
TheaterGen	40.4	53.3	37.9	84.4	14.88	4.90
Story-Adapter	73.7	56.4	58.9	84.9	13.73	4.89
Story2Board	55.2	51.4	56.7	85.5	15.26	5.11
StoryDiffusion	63.5	57.0	59.7	85.3	15.71	5.76
SEED-Story	74.9	48.7	29.5	85.9	6.33	3.84
UniMAGE w/o ID-P	52.6	55.6	62.5	87.00	12.06	4.44
UniMAGE w/o DEL	61.8	58.3	77.4	86.81	9.85	3.91
UniMAGE (Ours)	59.0	59.2	80.8	88.07	12.97	4.55

Figure 9. User study. The smaller value means the better quality.

Quantitative Ablations. The ablation results in Table 1 further confirm the effectiveness of the ID-P and DEL strategies. Specifically, ID-P can significantly enhance character consistency and alignment. DEL effectively improves image quality and aesthetic appeal, whereas the original Bagel exhibits limitations. In addition, as shown in Figure 8, DEL enables the model to support more flexible and logically coherent textual script generation.

User study. We invited 50 volunteers to evaluate 40 generated scripts, comparing UniMAGE with baseline methods. In each comparison set, participants ranked four results based on overall quality, plot alignment, character consistency, and narrative logic (the latter only against SEED-Story). After excluding invalid responses, the average rankings are shown in Figure 9, with a GSB (Good: Same: Bad) score of 0.72 for narrative logic. These results demonstrate that most users prefer the scripts generated by UniMAGE.

5. Conclusions

In this work, we introduce UniMAGE, a unified director model that integrates script drafting and keyframe generation within a single framework. Built on a Mixture-of-Transformers architecture, UniMAGE connects textual reasoning with visual generation to support long-context, multi-shot narratives with coherent logic and visuals. The model is trained with two complementary paradigms: Interleaved Concept Learning, which aligns narrative concepts via text–image interleaving, and Disentangled Expert Learning, which separates script and keyframe generation to improve creativity and visual quality. With additional support from In-Context ID Prompting and Pre-Context Script Splitting, UniMAGE maintains character identity, narrative continuity, and visual alignment over long sequences. Experiments show that UniMAGE achieves state-of-the-art performance among open-source systems, providing a strong basis for future AI-driven filmmaking.

Limitations. UniMAGE primarily focuses on narrative coherence and visual consistency, while more nuanced aspects of filmmaking—such as emotional pacing or cinematic style—remain open for future exploration.

Impact Statement

UniMAGE raises risks related to synthetic media misuse, copyright-sensitive generation, and labor displacement, which should be addressed through transparent provenance, moderation, and human-centered deployment.

A. Mixture-of-Transformers Architecture

Our UniMAGE framework is based on the Mixture-of-Transformers (MoT) architecture introduced in Bagel (Deng et al., 2025), as shown in Figure 10. MoT combines two transformers through shared multimodal self-attention layers. The transformer parameters are initialized from the Qwen 2.5 LLM (Hui et al., 2024). To improve training stability, each attention block includes the QK-Norm (Dehghani et al., 2023a).

The visual information is represented from two aspects:

1) Visual understanding — handled by a ViT encoder. It uses SigLIP2-so400m/14 (Tschannen et al., 2025) with a fixed input resolution of 384 for initialization. The position embeddings are interpolated, and the maximum input size is set to 980×980 . NaViT (Dehghani et al., 2023b) is incorporated to handle images in their native aspect ratios. A two-layer MLP connector aligns the ViT token dimensions with the LLM hidden states.

2) Visual generation — managed by a pre-trained VAE model from FLUX (Labs, 2024), which maps images between pixel and latent spaces. The latent representation has a downsampling ratio of 8, and the latent channels is 16. A 2×2 patch embedding layer is used to further reduce spatial dimensions and align with the LLM hidden size.

Within MoT, text, ViT, and VAE tokens are interleaved according to the multimodal input structure. For tokens from the same sample, it uses a generalized causal attention scheme. Tokens are divided into sequential splits by modality (text, ViT, or VAE). Each split can attend to all earlier splits, with causal attention applied to text tokens and bidirectional attention for vision tokens.

Figure 10. **Architecture of Mixture-of-Experts.** MoT employs two Transformer experts to process understanding and generation information, and all tokens are processed through a shared multi-modal self-attention in each Transformer block. Two distinct encoders, i.e., ViT and VAE, are adopted separately to capture semantic content and low-level information for image understanding and generation.

B. Supplementary on Script Dataset

The construction of a text–image interleaved script dataset presents significant challenges. Therefore, we detail our method for building such a dataset from multi-shot videos. Specifically, we curate a film dataset comprising approximately 800k multi-shot video clips, employing a video filtering strategy consistent with that adopted in Seedance 1.0 (Gao et al., 2025). We then utilize Gemini 2.5 Pro (DeepMind, 2025a) to generate captions for these video clips using the designed prompt. Subsequently, Q-Align (Wu et al., 2023) is employed to assess the image quality and aesthetics of keyframes, from which we select one keyframe image within the first 10% of frames of each video clip. After filtering based on these quality metrics, approximately 450k multi-shot video clips are retained to construct the final text–image interleaved script dataset. To automatically generate user prompts, we define four types of prompt styles: (1) simple narrative, (2) abstract concept, (3) phrase splicing, and (4) spoken expression. The detailed prompt design is presented as follows.

Multi-Shot Video Annotation Prompt**# Role**

You are a professional video content analyst.

Task

Your task is to accurately analyze the provided video file (including video and audio content) and provide structured annotation information according to my requirements. You need to understand both visual and auditory information and correlate them.

Please annotate this video clip containing {NUM_VIDEOS} sorted shots. The annotation format needs to be JSON, with the key-value pairs as follows:

```
{
  "global_caption":
  {
    "first_frame_description": "Detailed visual element annotation of the first frame
      ↪ of the video, including a description of the camera angle, visual style,
      ↪ main characters, environment, and main objects, as well as the position and
      ↪ posture of each element. At most 100 words."
    "video_audio_description": "Detailed annotation of the entire audio and video,
      ↪ including a description of the video's camera movement, visual style, how
      ↪ the N objects interact in the M environments, including the manner, style,
      ↪ intensity, and specific actions of the interactions, conversation content,
      ↪ etc. At most 150 words."
    "key_character_description": "Detailed appearance description of the N objects (N
      ↪ people or items) and M environments contained in the entire video. The
      ↪ annotation results need to be indexed by serial numbers for the identified
      ↪ N objects and M environments. At the same time, please select the most
      ↪ representative frame for each object's appearance to be used for subsequent
      ↪ extraction of the object's visual features. The overall format is, for
      ↪ example, {{Character1: caption:..., short_caption: a concise version of the
      ↪ caption, each object description does not exceed 10 words (E.g., middle-
      ↪ aged white male, short gray curly hair, black-framed glasses, wrinkles
      ↪ around the eyes/forehead, dark green button-down shirt), frame_id: {{shot:
      ↪ i, second: x}}, Character2: caption:..., short_caption:..., frame_id: {{
      ↪ shot: j, second: y}}, ...}}
  },
  "shot_caption": "Covers the first frame appearance description of the current shot
    ↪ segment, and the video and audio description of the current shot segment. The
    ↪ ID indexes of the characters and environments that appear in all shots need to
    ↪ be aligned and consistent with the global annotations, appearing in the text
    ↪ annotation results involving characters in the format of \<Character1\>, \<
    ↪ Character2\>..."
}
[
  {
    "first_frame_description": "A detailed description of the first frame of the
      ↪ current shot, including a description of the camera angle, visual style,
      ↪ main characters, environment, and main objects, as well as the position
      ↪ and posture of each element. At most 100 words."
    "video_audio_description": "A detailed description of the video and audio of
      ↪ the shot segment, at most 150 words. Please describe in order the video's
      ↪ camera movement, visual style, the appearance and specific events of
      ↪ the characters that appear, the appearance of the environment they are
      ↪ in, the interaction process between characters, environments, and
      ↪ objects, what the characters said and in what tone (keep the original
      ↪ spoken content, do not translate, and mark the spoken content with <-
      ↪ and ->), background sound description (style, content, and intensity,
      ↪ marked with <- and ->), and possible voice-overs, etc."
    "have_background_audio": Select from ["None", "Environment", "Music"], which
      ↪ respectively represent: no background sound, background environment
      ↪ sound, and background music sound. Except for the None tag, other tags
```

```

        ↪ can be selected in combination.
    }},
    ...
]
}},
"user_prompt": Use a sentence of no more than 40 words to describe global_caption
    ↪ and shot_caption. Please randomly select one of the following 4 styles to
    ↪ imitate and describe. This will be used as the input for the subsequent
    ↪ training of the video text annotation model. The output is global_caption and
    ↪ shot_caption. If shot_caption contains multiple shots, randomly choose whether
    ↪ to label each shot individually, for example, shot 1:..., shot 2:...
"user_prompt_style": The selected style number.
"user_prompt_has_shot": Whether to choose to caption each shot individually, true or
    ↪ false.
}}
    
```

The video and audio should be described simultaneously in chronological order. Do not describe the video first and then the audio. Only return the annotation results, do not return other content.

The annotation results should all be in {LANGUAGE}, but please keep the spoken content in the original language. Only annotate the original content of the video, without inference or imagination.

User prompt styles to be selected:

1. Simple narrative, such as a cute anthropomorphic kitten, wearing an apron, holding a frying pan in one hand, frying braised pork in a pot, the frying sound is sizzling, the pot is smoking, and the smoke is lingering above the pot.
2. Abstract concepts, such as the ancient Qin Shihuang unified the six kingdoms.
3. Phrase splicing, such as a photo, a super large and expensive panda, light champagne color, close-up of facial features, wearing a suit, dancing in the square, medium shot, parallel perspective, slowly close up, bright colors, cheerful, extremely delicate pictures, ultra-high resolution, and movie effects.
4. Spoken expression, such as generating a video of a panda mother riding a shared bicycle and taking a panda baby to school, the panda needs to be realistic, not cartoon, and the background is a vegetable market.

C. Supplementary on Experiments

Due to the page limitations of the main text, it is not possible to display the complete generated multimodal scripts. The full versions of all results presented in the main paper are provided below. In addition, we include additional generated scripts to further demonstrate the generalizability of UniMAGE.

D. Supplementary on Audio-Video Generation

Returning to our original motivation, beyond story visualization, we aim to develop a unified director model capable of serving audio-video generation systems. Accordingly, we provide two video examples on our project page to demonstrate the capability of UniMAGE in facilitating automated audio and video generation. We sincerely encourage readers to view the paper in conjunction with these videos. These two video demonstrations are generated using the Veo3 I2V model (DeepMind, 2025b), with the scripts, character lines, and sound effect descriptions provided by UniMAGE. It is worth noting that, due to the current limitations of audio-video generation models, the timbre and facial features of characters may vary during the generation of long multi-camera videos. These issues warrant further investigation and improvement in future work.

Result Gallery

<User>: A team of archaeologists uncovers a mysterious ancient artifact, leading to an unexpected adventure.

<Character1>: A woman with long, dark brown hair, smiling warmly. She wears a dark grey coat and a blue and green patterned scarf.

<Character2>: A man with short, dark brown hair, a friendly smile, wearing a dark pinstriped shirt. **<Character3>:** A woman with long, blonde hair, smiling brightly, wearing a white t-shirt and a silver necklace.

<Environment1>: A dusty, dimly lit archaeological dig site, with ancient stone walls and unearthed artifacts, illuminated by work lights and natural light filtering from above.

<Environment2>: A vibrant, lush jungle with dense foliage, ancient ruins partially covered by vines, and sunlight dappling through the canopy.

<Frame1>: Medium shot: **<Character1>** is kneeling in the dirt of the archaeological dig site **<Environment1>**, carefully brushing dust from an ancient, ornate stone tablet. Her expression is focused and intrigued. Around her are various archaeological tools.

<Video1>: The shot opens with **<Character1>** meticulously cleaning the artifact in the archaeological dig site **<Environment1>**. She gasps softly. **<-It's beautiful... and unlike anything I've seen before.->** The camera slowly zooms in on the intricate carvings of the tablet. **<-Soft, inquisitive orchestral music begins.->**

<Frame2>: Medium shot: **<Character2>** stands over **<Character1>** in the archaeological dig site **<Environment1>**, holding a notepad and looking at the tablet with a curious, slightly excited expression. **<Character1>** looks up at him, a question in her eyes.

<Video2>: Still in the archaeological dig site **<Environment1>**, **<Character2>** leans in, examining the tablet. **<-Do you think it's a map? Or a key?->** **<Character1>** shakes her head, still studying the carvings. **<-It feels more than that. It feels... active.->** The camera pans slightly to show more of the ancient stone walls around them. **<-The music becomes slightly more mysterious.->**

<Frame3>: Close-up: **<Character3>** enters the frame, her eyes wide with wonder as she looks at the tablet held by **<Character1>**. Her blonde hair frames her face, and her smile is replaced with an expression of awe.

<Video3>: **<Character3>** rushes over to the tablet in the archaeological dig site **<Environment1>**, her previous bright demeanor now softened by awe. **<-Incredible! What do you think it means?->** **<Character1>** points to a specific symbol. **<-I believe it points to something hidden. Something beyond our current understanding.->** **<-A subtle, shimmering sound effect accompanies the pointed symbol.->**

<Frame4>: Long shot: The three characters, **<Character1>**, **<Character2>**, and **<Character3>**, are now in the lush jungle **<Environment2>**. They are walking cautiously through dense foliage, with **<Character1>** holding the tablet, looking ahead with determination. Sunlight filters through the canopy.

<Video4>: The scene shifts to the vibrant jungle **<Environment2>**. The trio navigates through the dense undergrowth, **<Character1>** leading the way, the tablet clutched in her hands. **<Character2>** scans their surroundings. **<-Are you sure this is the right way, Dr. Anya?->** **<Character1>** nods confidently. **<-The tablet's energy readings are strong here.->** **<-Jungle ambient sounds, birds chirping, and a sense of adventure in the music.->**

<Frame5>: Medium shot: **<Character3>** is carefully pushing aside large, leafy plants in the jungle **<Environment2>**, revealing a partially overgrown ancient stone archway. Her expression is one of excited discovery.

<Video5>: **<Character3>** pushes aside a curtain of vines in the jungle **<Environment2>**, revealing a hidden, vine-covered archway. She gasps. **<-Look! An entrance!->** **<Character1>** and **<Character2>** quickly move to her side, their faces alight with anticipation. **<-The music swells with a sense of triumph and discovery.->**

<Frame6>: Close-up: The three characters, **<Character1>**, **<Character2>**, and **<Character3>**, stand before the archway in the jungle **<Environment2>**, their faces illuminated by a soft, ethereal glow emanating from the tablet held by **<Character1>**. Their expressions are a mix of wonder and excitement.

<Video6>: As they stand before the archway in the jungle **<Environment2>**, the tablet in **<Character1>**'s hands begins to glow more intensely, casting an ethereal light on their faces. **<Character2>** whispers, **<-It's reacting to the archway.->** **<Character3>** reaches out a hand, almost touching the glowing stone. **<-What wonders lie beyond?->** **<-The music becomes more magical and suspenseful, with a rising crescendo.->**

<Extension>: Exploring the ancient temple, the archeologists discover a hidden chamber where the artifact is revealed to be a celestial map.

<Frame7>: Medium shot: **<Character1>** holds the glowing tablet, her eyes wide with a mix of wonder and trepidation, as she stands at the entrance of a newly revealed, dimly lit chamber within the jungle **<Environment2>**. **<Character2>** and **<Character3>** are just behind her, their faces reflecting the tablet's light, their expressions mirroring hers. The entrance is carved into ancient stone, partially covered by vines.

<Video7>: The camera pushes slowly into the dimly lit chamber as **<Character1>**, **<Character2>**, and **<Character3>** step inside from the jungle **<Environment2>**. The tablet in **<Character1>**'s hands pulses with a soft, ethereal light, illuminating ancient carvings on the chamber walls. **<Character1>** whispers, **<-This isn't just an archway... it's a gateway->** **<Character2>** looks around nervously. **<-I have a bad feeling about this, Anya->** **<Character3>** gasps, pointing to a central pedestal. **<-Look!->** **<-Mysterious, echoing ambient sounds, and a low, rumbling orchestral hum->**.

<Frame8>: Long shot: Inside the chamber, the three characters, **<Character1>**, **<Character2>**, and **<Character3>**, are standing before a large, ornate pedestal. On the pedestal rests a larger, identical-looking stone tablet, glowing faintly. The chamber walls are covered in intricate, celestial patterns, illuminated by the tablet's light. The entrance they came through is now blocked by falling debris.

<Video8>: The camera pans across the chamber, revealing a grand, circular room with celestial patterns etched into the walls. In the center, on a stone pedestal, rests a larger, identical tablet, glowing with a faint, internal light. As **<Character1>** approaches it, the tablet in her hand intensifies its glow, and the chamber's entrance suddenly collapses, sealing them inside. **<-A loud crash as the entrance seals->**. **<Character2>** shouts, **<-The entrance! It's blocked!->** **<Character3>** clutches **<Character1>**'s arm. **<-What's happening?->** **<-The music becomes more urgent and percussive->**.

<Frame9>: Close-up: The larger tablet on the pedestal in the chamber begins to spin slowly, its glowing symbols shifting and rearranging. **<Character1>**'s face is illuminated by its intense light, her expression a mix of awe and dawning realization. **<Character2>** and **<Character3>** are partially visible in the background, looking on with concern.

<Video9>: The camera focuses on the larger tablet on the pedestal. Its surface begins to glow intensely, and the celestial patterns on its surface start to shift and rearrange, forming a complex, star-filled map. **<Character1>** stares, mesmerized. **<-It's... it's a map. Not of Earth, but of the cosmos!->** **<Character2>** steps closer, his concern mixed with fascination. **<-But what does it mean?->** **<-A high-pitched, harmonic hum emanates from the tablet, growing in intensity->**.

<Frame10>: Close-up: **<Character1>** stands before the spinning, glowing tablet, her face illuminated by its golden light. Her expression shifts from awe to realization. Tiny motes of light swirl around her as if drawn from the tablet itself. Behind her, faint beams of light trace ancient symbols across the chamber walls, revealing constellations that seem to move.

<Video10>: The camera slowly pushes in on **<Character1>** as the glow from the tablet intensifies, bathing her face in warm, radiant light. Her eyes widen, reflecting galaxies forming within the spinning tablet. **<Character2>** calls out, **<-Step back!->** but his voice is drowned out by the rising hum. **<Character1>** whispers, barely audible, **<-It's... showing me... everything->** The chamber trembles, dust falling from the ceiling.

<Frame11>: Medium shot: As the celestial map on the tablet fully forms, beams of light shoot out from its surface, projecting onto the chamber walls. These beams highlight specific constellations and symbols. **<Character1>** reaches out a hand towards the light, while **<Character2>** and **<Character3>** look up in astonishment, their faces bathed in the ethereal glow.

<Video11>: As the celestial map fully forms, beams of light shoot out from the tablet, projecting onto the chamber walls. These beams highlight specific constellations and ancient symbols, causing them to glow in response. **<Character1>** reaches out, almost touching a beam. **<-It's reacting to us!->** **<Character3>** gasps. **<-It's beautiful... but also terrifying->** **<-The harmonic hum intensifies, joined by a chorus of ethereal voices->**.

<Continuation>: Based on the above script, continue to write the subsequent shot content.

<Frame12>: Long shot: The chamber floor begins to glow with the same celestial patterns, and cracks appear, revealing ancient, stone guardians slowly rising from the ground. Their eyes glow with a faint, internal light. **<Character1>**, **<Character2>**, and **<Character3>** stand frozen in fear, looking at the awakening guardians.

<Video12>: Suddenly, the chamber floor begins to glow with the same celestial patterns, and cracks spiderweb across the stone. From these cracks, ancient, stone guardians slowly rise, their forms imposing and their eyes glowing with a faint, internal light. **<Character1>**, **<Character2>**, and **<Character3>** are frozen in fear, backing away slowly. **<Character2>** stammers, **<-What... what are those things?->** **<-A deep, resonant rumble accompanies the guardians' awakening, followed by a menacing, low-frequency drone->**.

<User>: An astrophysicist gave a passionate speech, making the lecture hall feel like the vast universe.

<Character1>: A middle-aged man with short, graying hair, wearing glasses, a light blue collared shirt, and a striped tie. He has a serious yet engaging expression, with his right hand raised in a gesturing motion.

<Environment1>: A modern lecture hall with rows of seats, a large projection screen behind the speaker, and professional stage lighting. The atmosphere is academic and inspiring.

<Environment2>: A dimly lit planetarium dome, filled with swirling projections of stars and galaxies, creating an immersive and awe-inspiring celestial environment.

<Frame1>: Close-up: The astrophysicist **<Character1>** in the lecture hall **<Environment1>**, his face illuminated by the stage lights, a thoughtful smile playing on his lips as he looks towards the audience. His glasses reflect the light, adding to his scholarly appearance.

<Video1>: A close-up on the astrophysicist's **<Character1>** face in the lecture hall **<Environment1>**. He leans slightly forward, his voice filled with wonder. **<-Imagine, if you will, the sheer vastness... the unimaginable scales at play.->** The camera then pans slowly to show a segment of the eager audience, nodding in appreciation. **<-The music swells slightly, maintaining an inspiring tone.->**

<Frame2>: Medium shot: The astrophysicist **<Character1>** stands confidently on stage in the lecture hall **<Environment1>**, gesturing with both hands as he explains a complex concept. The projection screen behind him now displays a vibrant image of a galaxy.

<Video2>: The shot returns to a medium shot of the astrophysicist **<Character1>** in the lecture hall **<Environment1>**. He points to the projection screen, which now displays a breathtaking image of a distant galaxy. **<-This, my friends, is just a glimpse of the grand design.->** He takes a step forward, his voice becoming more emphatic. **<-The very fabric of space-time, bending and twisting under the immense gravity of these cosmic behemoths!->** **<-Music becomes more dynamic and slightly dramatic.->**

<Frame3>: Long shot: The astrophysicist **<Character1>** is a silhouette against the bright projection of a swirling nebula in the planetarium dome **<Environment2>**. He stands with his arms outstretched, as if embracing the celestial display. The dome above him is a canvas of stars and cosmic dust.

<Video3>: The scene transitions to a long shot inside a breathtaking planetarium dome **<Environment2>**. The astrophysicist **<Character1>** is silhouetted against a stunning projection of a swirling nebula, his arms wide. His voice, now softer, echoes through the vast space. **<-And here, in the planetarium, we are not just observers, but participants in this cosmic dance.->** The camera slowly rotates, showcasing the immersive starry projections. **<-Gentle, awe-inspiring ambient music with celestial sounds begins.->**

<Frame4>: Close-up: The astrophysicist **<Character1>** in the planetarium dome **<Environment2>**, his face lit by the ethereal glow of the star projections. His eyes are wide with wonder, and a profound sense of discovery is etched on his features.

<Video4>: A close-up on the astrophysicist's **<Character1>** face in the planetarium dome **<Environment2>**. His expression is one of pure awe and childlike wonder. **<-Every star, every galaxy, tells a story billions of years in the making. And we, are privileged to witness it.->** A single tear of joy might glisten in his eye. The camera slowly pulls back to a medium shot, revealing him looking up at the dome in profound contemplation. **<-The music swells to a powerful, hopeful crescendo, then fades slowly.->**

<User>: A young bakers patisserie is subject to a surprise inspection by urban management officers.

<Character1>: A young woman with long, straight blonde hair, bright blue eyes, and a warm, inviting smile. She wears a simple, light-colored top, conveying a gentle and optimistic demeanor.

<Character2>: A middle-aged man in a formal military-style uniform with gold accents is intently writing on a clipboard inside a bright, elegant bakery.

<Environment1>: A cozy, sunlit kitchen with vintage decor, filled with the aroma of freshly baked goods. Warm and inviting, with soft natural light streaming through a window.

<Environment2>: A charming, newly opened patisserie with elegant displays of pastries, soft lighting, and a welcoming atmosphere.

<Frame1>: Close-up: A young woman **<Character1>** with a focused yet hopeful expression, her blonde hair falling softly around her shoulders. Her hands are gently kneading dough on a wooden counter in a warm kitchen **<Environment1>**.

<Video1>: The shot opens with a close-up on the hands of the young woman **<Character1>** as she expertly kneads dough. The camera slowly pulls back to a medium shot, revealing her focused expression and the cozy kitchen **<Environment1>** around her. She hums softly to herself. **<-Soft, melodic piano music begins->**.

<Frame2>: Medium shot: The young woman **<Character1>** carefully decorating a small, intricate cupcake with delicate frosting swirls, her tongue slightly out in concentration, in the same kitchen **<Environment1>**.

<Video2>: Still in the kitchen **<Environment1>**, the camera focuses on the young woman **<Character1>** as she meticulously decorates a cupcake. She adds a tiny, edible flower with tweezers. She smiles, satisfied with her work. **<-The melodic piano music continues, becoming slightly more upbeat->**.

<Frame3>: Medium shot: A stern-faced man **<Character2>** in a crisp uniform stands just inside the entrance of the patisserie **<Environment2>**, holding a clipboard. The young woman **<Character1>** looks at him with a slightly puzzled expression.

<Video3>: The camera cuts to a medium shot of a man **<Character2>** in a uniform, holding a clipboard, standing formally in the entrance of the patisserie **<Environment2>**. He surveys the room with a critical eye. The young woman **<Character1>** approaches him cautiously. **<-Good morning, I'm Mr. Henderson from the city's health department->** he states, his voice firm. **<Character1>** looks surprised. **<-Health department? Oh, right->** **<-The jazz music abruptly stops, replaced by a low, suspenseful hum->**.

<Frame4>: Close-up: The man **<Character2>** points a pen at a section of the display case in the patisserie **<Environment2>**, his expression unyielding. The young woman **<Character1>**'s face is visible in the background, a look of growing concern on her face.

<Video4>: A close-up shows the man **<Character2>** pointing his pen at a small, almost imperceptible smudge on the glass of a display case in the patisserie **<Environment2>**. **<-I'm afraid I have some notices to serve you, regarding unsanitary conditions->** he says, his voice devoid of emotion. **<Character1>**'s eyes widen in alarm. **<-Unsanitary? But... everything is clean!->** she protests, her voice trembling slightly. **<-A sharp, dissonant chord plays->**.

<Frame5>: Medium shot: The man **<Character2>** hands a printed notice to the young woman **<Character1>** across the counter in the patisserie **<Environment2>**. Her hand is shaking as she takes it, her hopeful expression replaced by shock and dismay.

<Video5>: The camera returns to a medium shot. The man **<Character2>** calmly hands a formal notice to the young woman **<Character1>** across the counter in the patisserie **<Environment2>**. Her hand visibly trembles as she takes the paper. She reads it, her face draining of color. **<-This can't be happening->** she whispers, almost to herself. **<-The suspenseful hum intensifies, with a faint, ominous cello note->**.

<Frame6>: Close-up: The young woman **<Character1>** sits at a small table in the patisserie **<Environment2>**, head in her hands, the health notice crumpled beside her. A ray of sunlight illuminates her tear-streaked face.

<Video6>: A close-up shows the young woman **<Character1>** sitting at a small table in the patisserie **<Environment2>**, her head buried in her hands. The crumpled health notice is visible next to her. A single ray of sunlight cuts through the window, illuminating the tear-streaked face on her. **<-A faint, melancholic piano melody begins, very soft->**. She slowly looks up, her eyes filled with a new resolve, a glimmer of defiance in their depths. **<-I won't give up->** she whispers, a hint of steel in her voice.

<User>: A man discovers an ancient map in his attic, leading him on a solitary adventure to uncover a hidden treasure.

<Character1>: A man in his late 30s, fair skin, short dark brown hair, wearing a casual blue t-shirt with a white graphic design.

<Environment1>: A dusty, dimly lit attic filled with old furniture, boxes, and cobwebs, with shafts of light filtering through a small window, creating a mysterious and nostalgic atmosphere.

<Environment2>: A lush, overgrown jungle, vibrant green leaves, dappled sunlight, and ancient stone ruins, conveying a sense of adventure and discovery.

<Frame1>: Medium shot: A man<Character1> with a curious expression, holding a rolled-up, yellowed map in his hands, illuminated by a faint shaft of light in the dusty attic<Environment1>. He is surrounded by old, stacked boxes.

<Video1>: The shot opens with a medium shot of the man<Character1> in the attic<Environment1>, carefully unrolling an ancient map. He traces a finger along its faded lines, a look of intrigue on his face. The camera slowly zooms in on the map, revealing intricate details and cryptic symbols. <-Dusty, quiet attic ambiance with a hint of mysterious orchestral music->.

<Frame2>: Close-up: The man's<Character1> hand pointing to a specific, marked location on the map, which is covered in intricate drawings and old script. The map is spread out on a dusty wooden table in the attic<Environment1>.

<Video2>: A close-up on the map spread across a dusty table in the attic<Environment1>. The man's<Character1> hand points to a prominent 'X' mark. He mutters to himself: <-Could it be true?-> The camera then pans up to his determined face as he folds the map, a glint of adventure in his eyes. <-A sudden, adventurous musical motif begins->.

<Frame3>: Close-up: The man's<Character1> face, covered in a slight sheen of sweat, his eyes widening in surprise and excitement as he spots something off-camera. He has a hopeful, eager expression.

<Video3>: A close-up on the man's<Character1> face. His eyes suddenly light up with excitement and relief. He gasps slightly: <-There it is!-> The camera quickly pulls back to shoot the man's full body as he is hiking and exploring in the jungle. <-A dramatic, hopeful musical crescendo->.

<Frame4>: Long shot: The man<Character1>, now dressed in practical adventure gear, stands at the edge of a dense jungle<Environment2>, looking into the thick foliage with a backpack on. Sunlight filters through the canopy.

<Video4>: A long shot shows the man<Character1> at the entrance of the jungle<Environment2>, a backpack firmly on his shoulders. He takes a deep breath, steeling himself, before stepping into the dense greenery. The camera follows him as he pushes aside large leaves, continuing his journey. <-Sound of rustling leaves and exotic jungle birds, adventurous music continues->.

<Frame5>: Medium shot: The man<Character1> carefully navigates through the jungle<Environment2>, pushing aside vines and looking intently at his compass. Sweat glistens on his forehead.

<Video5>: Medium shot of the man<Character1> trekking through the jungle<Environment2>. He consults his compass and the map, his brow furrowed in concentration. He occasionally glances up, scanning the surroundings. <-Heavy breathing of the man, intense, rhythmic adventure music->.

<Frame6>: Medium shot: The man<Character1> stands before a moss-covered stone archway, part of ancient ruins in the jungle<Environment2>. He reaches out to touch the weathered stone, a look of awe on his face.

<Video6>: Medium shot of the man<Character1> standing before a magnificent, moss-covered stone archway within the ancient ruins in the jungle<Environment2>. He runs his hand along the cold, weathered stone, a look of profound awe on his face. He whispers: <-Unbelievable...-> <-Mysterious, echoing music with jungle sounds->.

<Frame7>: Close-up: The man's<Character1> hands digging through loose earth near the ruins in the jungle<Environment2>, revealing a corner of a wooden chest. His expression is one of intense focus and anticipation.

<Video7>: Close-up of the man's<Character1> hands frantically digging through loose earth near the ruins in the jungle<Environment2>. He uncovers a corner of an old, wooden chest. His breathing is quick and shallow with anticipation. <-Sound of digging earth, heart-pounding suspenseful music->.

<Frame8>: Medium shot: The man<Character1> triumphantly pulls a small, ornate wooden chest from the ground in the jungle<Environment2>. He looks up at the sky, a wide smile spreading across his face.

<Video8>: Medium shot of the man<Character1> finally pulling the small, ornate wooden chest entirely out of the ground in the jungle<Environment2>. He holds it aloft, a triumphant smile beaming across his face. He lets out a joyful shout: <-I found it!-> <-Triumphant, celebratory orchestral music swells->.

<Frame9>: Medium shot: The man <Character1> stands in the jungle <Environment2>, holding the ornate wooden chest. His face is beaming with triumph, and the chest is slightly ajar, revealing a faint golden glow emanating from within. Sunlight filters through the dense canopy.

<Video9>: The shot opens with a medium shot of the man <Character1> in the jungle <Environment2>, still beaming, holding the ornate wooden chest. He carefully opens it further, and a soft, golden light spills out, illuminating his face. He gasps in awe. <-A shimmering, magical sound effect, followed by a soft, ethereal melody->.

<Continuation>: Based on the above script, continue to write the subsequent shot content.

<Frame10>: Close-up: The man's <Character1> hand reaches into the chest, pulling out a glowing, intricately carved amulet. His eyes are wide with wonder, reflecting the golden light of the amulet. The background is a blur of jungle foliage <Environment2>.

<Video10>: A close-up on the man's <Character1> hand as he pulls a glowing, intricately carved amulet from the chest. His eyes are wide with wonder. As he holds it, the amulet pulses with a brighter light. <-A low, resonant hum begins, growing in intensity->.

<Continuation>: Based on the above script, continue to write the subsequent shot content.

<Frame11>: Close-up: The man's <Character1> determined expression. He clenches his jaw, and a spark of resolve enters his eyes, suggesting he's ready to confront the challenge. The glowing amulet is held firmly in his hand, just out of frame.

<Video11>: Close-up on the man's <Character1> face. His initial wonder gives way to a look of fierce determination. He clenches his jaw, and a spark of resolve ignites in his eyes. He takes a deep breath. <-A sudden, powerful percussive hit, followed by a surge of heroic, yet slightly ominous, orchestral music->.

<User>: A young boy, excited about his first magic show, accidentally conjures a playful ghost that creates delightful chaos.

<Character1>: A young boy, around 7 years old, with short brown hair and bright, curious eyes, wearing a blue and black striped long-sleeved sweater.

<Environment1>: A cozy living room, warm and inviting, with soft lighting from a table lamp and a window showing a moonlit night outside. There's a small, slightly cluttered coffee table in the center.

<Frame1>: Close-up: A young boy<Character1> with a wide, excited grin, his eyes sparkling with anticipation. He holds a small, slightly worn magic wand in his right hand, poised above a deck of cards on a coffee table in the cozy living room<Environment1>.

<Video1>: The shot opens with a close-up on the young boy's<Character1> eager face. He giggles excitedly, waving his magic wand over a deck of cards on the coffee table<Environment1>. He mutters to himself: <Abracadabral!> The camera slowly pans out to a medium shot, revealing more of the cozy living room<Environment1> as he finishes his incantation. Soft, whimsical music begins: <Uplifting, playful piano music->.

<Frame2>: Medium shot: The young boy<Character1> looks surprised, his eyes wide, as a translucent, shimmering outline of a playful, cartoon-like ghost begins to materialize from the deck of cards on the coffee table<Environment1>. The ghost is still faintly transparent.

<Video2>: As the young boy<Character1> finishes his spell, a faint shimmering effect appears above the deck of cards on the coffee table<Environment1>. His eyes widen in surprise as a translucent, cartoon-like ghost slowly forms, looking around playfully. The boy gasps: <Whoa!> The camera focuses on the ghost as it floats up slightly. The whimsical music becomes more mischievous: <Whimsical, mischievous flute and pizzicato strings->.

<Frame3>: Medium shot: The ghost, now fully formed and glowing softly, floats mischievously above the coffee table<Environment1>, looking at the young boy<Character1> with a playful expression. The boy<Character1> stares back, a mix of awe and slight fear on his face.

<Video3>: The ghost, now fully materialized and glowing softly, zips playfully around the coffee table<Environment1>, knocking over a small stack of books. The young boy<Character1> takes a step back, a mix of awe and slight fear on his face, but a smile starts to form. He exclaims: <You're real!> The camera follows the ghost's playful movements. The music becomes more upbeat and lighthearted: <Upbeat, lighthearted orchestral music with a sense of wonder->.

<Frame4>: Close-up: The young boy<Character1> reaches out toward the glowing ghost, his hand trembling slightly with curiosity and wonder. The ghost leans forward playfully, its body shimmering with a soft, sparkling light.

<Video4>: The boy<Character1> hesitates, then slowly extends his hand toward the ghost. The ghost floats closer, smiling warmly. When their hands almost touch, small particles of light swirl between them, creating a gentle, magical glow. The boy gasps softly: <You're... real magic!> The camera circles around them, emphasizing the moment of connection. The background music softens: <Gentle harp and soft strings->.

<Frame5>: Medium shot: The boy<Character1> peeks from behind a curtain<Environment1>, his expression mixed with curiosity and concern. The soft light from the room spills onto his face as he watches the glowing ghost hover near the window.

<Video5>: The boy<Character1>, still amazed, quietly follows the ghost as it drifts toward the window curtains<Environment1>. He pulls the curtain aside just a bit, peering through the gap. The ghost floats gently, as if beckoning him to come closer. The boy whispers: <Where are you going?> The camera follows his cautious movement, keeping a warm yet slightly mysterious tone. The soundtrack shifts: <Tender piano notes with faint chimes->.

<Frame6>: Medium close-up: The boy<Character1> and the ghost stand by the shimmering curtain<Environment1>, their hands nearly touching again. The ghost's glow intensifies, casting dancing reflections of light on the boy's face.

<Video6>: The ghost turns to face the boy<Character1>, smiling brightly. It raises its hand, and the boy instinctively mirrors the gesture. When their fingertips meet, a wave of glowing light ripples through the curtain, opening a shimmering doorway of sparkles. The boy stares in awe, eyes wide, as the ghost drifts backward through the glowing veil. The music swells: <Uplifting orchestral crescendo with choir hums->, hinting at the beginning of a magical adventure.

<User>: A kind teacher organizes a special art project for two shy students to help them express themselves and bond.

<Character1>: A warm and encouraging woman in her late 20s or early 30s, with short, curly dark brown hair and a friendly smile. She wears a comfortable, light grey t-shirt.

<Character2>: A young boy, around 5-7 years old, with straight, short dark hair and a curious, slightly shy expression. He wears a bright blue and white striped tank top.

<Character3>: A young girl, around 5-7 years old, with straight, shoulder-length blonde hair and a gentle, somewhat reserved smile. She wears a light pink long-sleeved shirt with small black hearts on it.

<Environment1>: A brightly lit, colorful classroom with art supplies, paintings, and children's drawings displayed on the walls. The atmosphere is inviting and creative, with soft, natural light coming through large windows.

<Frame1>: Medium shot: **<Character1>** stands at the front of a brightly lit classroom**<Environment1>**, smiling warmly. Her hands are clasped gently in front of her, and her gaze is welcoming and encouraging. In the background, colorful artwork adorns the walls.

<Video1>: The shot opens with a medium shot of **<Character1>** in the classroom**<Environment1>**, her friendly smile radiating warmth. She gestures invitingly towards the camera. **<Good morning, everyone! Today, we're going to try something new!->** Her voice is soft and encouraging. The camera pans slightly to show some general classroom activity in the background. **<Upbeat, gentle piano music begins->**

<Frame2>: Medium shot: **<Character2>** is seated at a table in the classroom**<Environment1>**, looking down at a blank piece of paper with a slightly nervous but curious expression. His hands are resting on the table, and various art supplies are scattered around him.

<Video2>: The camera cuts to a medium shot of **<Character2>** at a table in the classroom**<Environment1>**. He looks hesitant, picking up a crayon then putting it down. **<Character1>**'s voice can be heard off-screen: **<Don't be shy. Just think of something that makes you happy->** **<Character2>** slowly looks up towards the direction of **<Character1>**. **<Gentle, encouraging string music plays->**

<Frame3>: Medium shot: **<Character3>** is seated at a nearby table in the classroom**<Environment1>**, sketching quietly with a pencil. She has a thoughtful, focused expression, occasionally glancing up with a shy smile. Art supplies are neatly arranged around her.

<Video3>: The camera shifts to a medium shot of **<Character3>** at another table in the classroom**<Environment1>**. She's sketching intently, her brow furrowed in concentration, then a shy smile crosses her face as she glances up. **<Character1>** walks over to **<Character3>** and gently says: **<That's beautiful. What are you drawing?->** **<Character3>** nods shyly. **<Soft, contemplative flute music joins the strings->**

<Frame4>: Medium shot: **<Character1>** is kneeling between **<Character2>** and **<Character3>**'s tables in the classroom**<Environment1>**, showing them a colorful art book. All three are looking at the book with engaged, curious expressions. **<Character2>** points at a picture.

<Video4>: The camera shows **<Character1>** kneeling between the two children's tables in the classroom**<Environment1>**. She opens a vibrant art book, pointing to different illustrations. **<Character2>** points excitedly at a picture of a colorful animal. **<Character3>** smiles faintly. **<Character1>** says: **<See how much fun art can be? What if we made something together?->** **<The music becomes slightly more playful and hopeful->**

<User>: A Qatari diplomat and a Japanese martial arts master work together with an American tourist at a bustling international market.

<Character1>: A man of Qatari descent, middle-aged, with a kind and thoughtful expression, wearing a traditional white thobe and ghutra, with a well-groomed beard.

<Character2>: A young Japanese woman, with a serious and observant demeanor, black hair styled in a traditional bun, wearing a vibrant red kimono with floral patterns.

<Character3>: A young Caucasian man, cheerful and approachable, with short brown hair, wearing a casual blue t-shirt and a backpack, with sunglasses hanging from his collar.

<Environment1>: A vibrant and bustling international market, filled with colorful stalls, exotic goods, and diverse crowds. The atmosphere is lively and slightly chaotic, with warm, inviting lighting and a mix of aromas.

<Frame1>: Medium shot: **<Character1>** stands thoughtfully amidst the colorful chaos of the international market **<Environment1>**, observing the scene with a subtle smile. He is dressed impeccably in his traditional Qatari attire, his gaze distant but engaged.

<Video1>: The shot opens with a medium shot of **<Character1>** in the bustling international market **<Environment1>**, taking in the sights and sounds. He walks slowly, his eyes scanning the various stalls and people. He then notices something out of place near a fruit stand. **<-Intriguing, very intriguing,->** he muses softly. Camera pans to follow his gaze. Background music: **<-Lively, exotic market music with a hint of mystery,->**

<Frame2>: Medium shot: **<Character2>** stands with quiet intensity near a kimono stall in the market **<Environment1>**, her eyes keenly observing the crowd. She wears a beautiful red kimono, her hair neatly tied, a subtle frown on her face as if something has caught her attention.

<Video2>: The camera cuts to a medium shot of **<Character2>** in the same market **<Environment1>**. She is observing the movements of a particular vendor with a focused, almost analytical gaze. She notices a small, unusual trinket on the ground that seems out of place. She kneels to examine it briefly. **<-This is not right,->** she whispers to herself. Camera zooms in on the trinket. Background music: **<-Subtle, inquisitive string music,->**

<Frame3>: Close-up: **<Character3>** is seen laughing heartily while taking a selfie with a colorful display in the market **<Environment1>**. He wears a blue t-shirt and backpack, his sunglasses glinting. His expression is one of pure enjoyment and amusement.

<Video3>: The camera shifts to a close-up of **<Character3>** in the market **<Environment1>**, beaming as he takes a selfie. He bumps into a display, causing a small, ornate box to tumble. He quickly picks it up, looking a bit sheepish. As he opens it, he finds a cryptic note inside. His smile fades into a look of confusion. **<-What's this?->** he mutters. Camera focuses on the note. Background music: **<-Upbeat, cheerful music transitions to a slightly puzzled tune,->**

<Frame4>: Medium shot: All three characters, **<Character1>**, **<Character2>**, and **<Character3>**, are now together in the market **<Environment1>**, huddled around the ornate box and the cryptic note. **<Character3>** looks bewildered, **<Character1>** is thoughtful, and **<Character2>** is intensely focused on the note.

<Video4>: The camera shows **<Character1>**, **<Character2>**, and **<Character3>** gathered together in the market **<Environment1>**. **<Character3>** explains what happened with the box and the note. **<Character1>** examines the note, while **<Character2>** points out a symbol on the box that matches a detail on the note. **<-This symbol... it's a regional guild mark,->** **<Character2>** observes. **<-And this note, it speaks of a hidden passage,->** adds **<Character1>**. Camera close-up on the note and the box. Background music: **<-Intriguing, collaborative music,->**

<User>: A renowned art critic and a cunning art forger find themselves in a tense cat-and-mouse game during a high-stakes auction for a disputed masterpiece.

<Character1>: A woman in her late 30s, with long, wavy dark brown hair, fair skin, and striking blue eyes. She wears a sophisticated black dress with delicate straps and a subtle smile, exuding confidence and allure.

<Character2>: A man in his late 50s, with short, neat gray hair, a clean-shaven face, and a warm, approachable smile that belies a sharp, discerning gaze. He wears a well-tailored light brown suit, a crisp white shirt, and a striped tie.

<Environment1>: A luxurious art auction house, opulent and dimly lit, with spotlights on the art pieces. The atmosphere is hushed and tense, filled with anticipation and subtle murmurs.

<Environment2>: A private, dimly lit study in an old mansion, filled with antique books, a large wooden desk, and various art tools and canvases scattered about. The air is thick with the smell of oil paint and old paper, creating a clandestine and slightly chaotic atmosphere.

<Frame1>: Close-up: A woman<Character1> with a subtle smile, her blue eyes scanning the room with an almost imperceptible glint of amusement. The soft light of the auction house<Environment1> catches her dark hair.

<Video1>: The shot opens with a close-up on <Character1>'s face, her eyes darting subtly across the room. She takes a slow, confident breath. The camera then pulls back slightly to a medium shot, revealing her elegant posture amidst the hushed opulence of the auction house<Environment1>. We hear the murmur of the crowd. <-Hushed, anticipatory classical music begins->.

<Frame2>: Medium shot: A man<Character2> in a light brown suit, his gaze fixed on a painting displayed under a spotlight. His smile is polite, but his eyes hold a critical, almost suspicious glint. The background shows other attendees in the auction house<Environment1>.

<Video2>: The camera cuts to a medium shot of <Character2>, who is standing a few rows behind <Character1>, his attention solely on the 'masterpiece' on display in the auction house<Environment1>. He adjusts his tie, a subtle gesture of unease. He then glances briefly towards <Character1>, a flicker of recognition in his eyes, before returning his gaze to the painting. <-The music becomes slightly more suspenseful->.

<Frame3>: Close-up: <Character1>'s hand, adorned with a delicate ring, subtly adjusts a small earpiece. Her expression remains composed, a hint of a challenge in her eyes. The background is a blur of the auction house<Environment1>.

<Video3>: A close-up on <Character1>'s hand as she makes a discreet adjustment to her earpiece. Her lips curve into a knowing, almost mischievous smile. The camera then pans slowly up to her face. She makes eye contact with <Character2> across the room, holding his gaze for a beat too long. <-A subtle, high-pitched chime sounds, almost imperceptible, followed by a slight shift in the music's tempo->.

<Frame4>: Medium shot: <Character2> observes <Character1> from across the auction house<Environment1>. His polite smile tightens slightly, a hint of concern or calculation in his eyes. The disputed painting is visible between them.

<Video4>: The camera returns to a medium shot of <Character2>, who has noticed <Character1>'s gaze. His smile becomes more strained as he processes her intent. He subtly shifts his weight, his eyes never leaving hers. He then takes a sip from a glass of water, his hand trembling almost imperceptibly. <-The music builds in subtle tension, a low thrumming->.

<Frame5>: Close-up: The auctioneer's gavel striking the podium. The sound echoes through the auction house<Environment1>. The light reflects off the gavel.

<Video5>: The camera focuses on a close-up of the auctioneer's gavel as it dramatically strikes the podium, signaling the start of the bidding. The sound is sharp and decisive, cutting through the murmurs of the auction house<Environment1>. We hear the auctioneer's voice: <-And now, for lot number 73, the highly contested 'Midnight Bloom'...-> <-Gavel strike, followed by a sudden silence in the music->.

<Frame6>: Medium shot: <Character1> raises her bidding paddle with a confident, almost defiant, expression. Her eyes sparkle with anticipation. The auction house<Environment1> is brightly lit around her.

<Video6>: The camera captures <Character1> in a medium shot, her hand rising smoothly with her bidding paddle. Her expression is a picture of calm confidence, a subtle challenge in her eyes as she looks towards the auctioneer. She speaks clearly: <-One million.-> The camera quickly pans to <Character2>, whose eyes widen almost imperceptibly. <-The music returns with a dramatic flourish, then softens to a watchful pulse->.

<Frame7>: Close-up: <Character2>'s hand, clutching his bidding paddle tightly. A bead of sweat forms on his brow. The background is blurred, focusing on his tense grip.

<Video7>: A close-up on <Character2>'s hand, now clutching his paddle with visible tension. A bead of sweat trickles down his temple. He hesitates, his gaze flickering between the auctioneer and <Character1>. He takes a deep breath, steeling himself, and raises his paddle. <One point five million.-> <-The music intensifies, a rapid, anxious rhythm.->

<Frame8>: Medium shot: <Character1> and <Character2> exchange intense glances across the auction house <Environment1>, the painting 'Midnight Bloom' between them. The tension in the room is palpable.

<Video8>: The camera shows <Character1> and <Character2> exchanging a long, loaded glance across the auction house <Environment1>. The 'Midnight Bloom' painting, now illuminated dramatically, seems to act as a silent third party. <Character1> offers a small, knowing smirk. <Character2>'s jaw tightens. The bidding accelerates, a silent battle playing out. <-The music becomes a rapid, escalating crescendo of strings and percussion.->

<Frame9>: Close-up: <Character1>'s triumphant smile as the auctioneer announces the final bid. Her eyes sparkle with victory. The background is a blur of the auction house <Environment1>.

<Video9>: A triumphant close-up on <Character1>'s face as the auctioneer's voice booms: <-Sold! To the lady in black!-> She offers a small, victorious smile, her blue eyes gleaming. The camera then cuts to <Character2>, who, after a moment of stunned silence, allows a wry, knowing smile to spread across his face. He nods almost imperceptibly towards <Character1>. <-The music resolves into a triumphant, yet slightly ambiguous, final chord.->

<Extension>: An art critic confronts a forger, leading to a tense chase through the auction house's hidden corridors.

<Frame10>: Medium shot: <Character1> stands confidently in the auction house <Environment1>, holding the 'Midnight Bloom' painting. Her smile is subtle, but her eyes convey a sense of accomplishment. <Character2> approaches her, his expression a mix of admiration and a hint of something more. The opulent setting of the auction house is visible around them.

<Video10>: The shot opens with <Character1> admiring the 'Midnight Bloom' in the auction house <Environment1>. <Character2> approaches her, a slight smile on his face. He extends a hand. <-Congratulations, my dear. A truly exquisite piece.-> <Character1> takes his hand, her smile widening slightly. <-Thank you. It's even more beautiful in person.-> The camera focuses on their hands, then pulls back to a medium shot as they begin to walk. <-Soft, elegant jazz music begins.->

<Frame11>: Close-up: <Character2>'s hand gently touches <Character1>'s arm, his gaze intense and unwavering. Her expression shifts from triumph to a flicker of surprise, then a subtle understanding. The background is a soft blur of the auction house <Environment1>.

<Video11>: A close-up on <Character2>'s hand as it gently touches <Character1>'s arm. His voice drops to a near whisper. <-There's something you should know about that painting. It's a masterpiece, yes, but it's also... a key.-> <Character1>'s eyes widen almost imperceptibly, a hint of concern crossing her face. <-A key to what?-> The camera holds on her face, showing her internal struggle. <-The jazz music becomes slightly discordant, a low, ominous cello note enters.->

<Frame12>: Medium shot: <Character2> leads <Character1> away from the main auction floor, towards a less crowded area of the auction house <Environment1>. He gestures subtly towards a discreet, ornate door. <Character1> follows, her curiosity piqued, a hint of unease in her posture.

<Video12>: Medium shot of <Character2> guiding <Character1> through the auction house <Environment1>, away from the main crowd. He gestures towards a hidden, ornate door. <-Follow me. There's something I need to show you, privately.-> <Character1> hesitates for a moment, then nods, her gaze fixed on the door. They move towards it, the camera tracking their movement. <-The music shifts to a more suspenseful, investigative tone.->

<Frame13>: Close-up: <Character2>'s hand expertly manipulates a hidden latch on the ornate door. The door creaks open slightly, revealing a glimpse of darkness beyond. <Character1>'s reflection is visible in the polished brass of the latch, her eyes wide with anticipation.

<Video13>: A close-up on <Character2>'s hand as he deftly opens the hidden latch on the ornate door. The door creaks open with a low groan, revealing a dark, narrow passage. <-This way.-> <Character2> whispers, stepping through. <Character1> follows, her breath held. The camera peers into the darkness of the passage. <-A low, creaking sound, followed by a sudden silence, then a faint, distant echo.->.

<Frame14>: Medium shot: <Character1> and <Character2> are now in the private study <Environment2>, a dimly lit room filled with antique books and art tools. <Character2> points to a specific book on a shelf, his expression serious. <Character1> looks at the book with a dawning realization.

<Video14>: Medium shot of <Character1> and <Character2> inside the private study <Environment2>. <Character2> points to a dusty, leather-bound book on a high shelf. <-This book... it holds the true secret of 'Midnight Bloom'. It's not just a painting, it's a map.-> <Character1> gasps softly, a sudden understanding washing over her face. <-A map? To what?-> The camera zooms in on the book. <-The music becomes more mysterious, with a faint, ticking sound underlying it.->.

<Frame15>: Medium shot: <Character1> and <Character2> exchange a look of alarm. <Character2> grabs <Character1>'s arm, urging her towards the hidden passage. The door to the private study <Environment2> is slightly ajar, revealing a sliver of light from the main auction house <Environment1>.

<Video15>: Medium shot of <Character1> and <Character2> exchanging a look of alarm. <Character2> grabs <Character1>'s arm. <-Someone's found us. We need to go. Now!-> He pulls her towards the hidden passage. The camera quickly pans to the slightly ajar door, showing a glimpse of the chaotic main auction house <Environment1> beyond. <-Footsteps are heard approaching rapidly, mixed with hushed murmurs. The music becomes a fast-paced, urgent chase theme.->.

<Frame16>: Close-up: <Character1>'s face, now determined and slightly breathless, as she looks ahead. Her blue eyes reflect a newfound resolve, no longer just a collector but a protector of a secret. The background is a blur of the corridor <Environment1>.

<Video16>: Close-up on <Character1>'s face, her expression a mix of breathlessness and fierce determination. She looks ahead, a new purpose in her eyes. <-I won't let them have it.-> she vows silently. The camera holds on her face, then slowly pulls back to show her continuing to move forward, into an unknown future. <-A single, sustained, hopeful orchestral note swells, then fades to black.->.

<Frame17>: Close-up: <Character1> stands in the dimly lit private room beyond the ornate door. The warm amber light flickers across her face, revealing both tension and curiosity. <Character2> steps closer, his voice low but deliberate. The faint hum of the jazz music fades, replaced by the rhythmic ticking of an unseen clock.

<Video17>: The camera lingers on <Character1>'s uneasy expression as <Character2> closes the door behind them with a soft click. <-You wanted to know what makes the 'Midnight Bloom' special, didn't you?-> he says quietly. She nods, her breath shallow. He gestures toward a small, velvet-covered table in the corner. A single envelope rests there. <-Open it.-> Her fingers tremble slightly as she reaches for it.

<User>: A renowned historian delivers an inspiring lecture on ancient civilizations at a public forum, captivating her audience with her knowledge and passion.

<Character1>: An elegant, mature woman with short, styled brown hair, wearing a light blue pantsuit, a white top, and a pearl necklace with matching pearl earrings. She has a warm, engaging smile and intelligent eyes.

<Environment1>: A brightly lit public forum stage with a dark background, featuring a podium with a microphone. The atmosphere is formal and engaging, with warm spotlights on the speaker.

<Frame1>: Close-up: A distinguished woman<Character1> with a bright, welcoming smile, her eyes sparkling with enthusiasm, stands at a podium in a brightly lit public forum<Environment1>. She is wearing a light blue pantsuit and pearls, and a microphone is visible next to her.

<Video1>: The shot opens with a close-up on the woman's<Character1> engaging face as she begins her lecture. She gestures subtly with one hand, captivating the audience. <-Good evening, everyone. Tonight, we journey back in time...-> The camera slowly pulls back to a medium shot, revealing more of the stage<Environment1> and the podium. <-...to the dawn of civilization, where ingenuity and ambition shaped our world.-> The lighting is warm and inviting, enhancing the academic yet accessible tone. Background music: <-Inspiring, light orchestral music with a sense of wonder.->.

<Frame2>: Medium shot: The woman<Character1> stands confidently at the podium in the public forum<Environment1>, her posture erect and her gaze sweeping across the unseen audience. She is mid-sentence, her expression animated and passionate.

<Video2>: Maintaining the medium shot, the woman<Character1> continues her talk, her voice filled with passion. <-Imagine, if you will, the pyramids rising from the desert sands, a testament to human ingenuity...-> She pauses for a moment, letting the image sink in, then continues with renewed vigor. <-...or the intricate gears of the Mesopotamian waterwheels, harnessing the very forces that sustained ancient societies.-> The camera slightly pans with her subtle movements, emphasizing her commanding presence on the stage<Environment1>. Background music: <-The orchestral music becomes more dramatic and awe-inspiring, building anticipation.->.

<Frame3>: Close-up: The woman's<Character1> face, her eyes wide with a sense of discovery and excitement, as she recounts a fascinating detail. A slight smile plays on her lips, reflecting her joy in sharing knowledge.

<Video3>: The camera returns to a close-up of the woman's<Character1> expressive face. She leans slightly into the microphone, sharing a particularly intriguing detail. <-And did you know, the first written language was developed not for recording, but for legal and economic transactions? It was a revolutionary concept!-> Her enthusiasm is infectious, and her eyes gleam with intellectual curiosity. The stage<Environment1> lighting remains focused on her, highlighting her animated expressions. Background music: <-A sense of mystery and discovery is added to the orchestral music, with gentle, inquisitive melodies.->.

<Frame4>: Medium shot: The woman<Character1> gestures broadly with both hands, her body language conveying excitement and deep understanding. She looks directly at the audience, engaging them with her words.

<Video4>: In a medium shot, the woman<Character1> uses her hands to emphasize a point, her voice strong and clear. <-These ancient peoples, despite the vast differences in their cultures, faced the same fundamental challenges: survival, community, and legacy.-> She makes eye contact, creating a personal connection with the audience. The stage<Environment1> feels alive with her energy. Background music: <-The orchestral music becomes more reflective and thoughtful, with a sense of universal understanding.->.

<Frame5>: Close-up: The woman<Character1> concludes her point with a warm, satisfied smile, her eyes conveying a sense of accomplishment and shared understanding. She looks directly at the camera, as if addressing each viewer individually.

<Video5>: The shot ends with a close-up of the woman<Character1> as she brings her segment to a thoughtful conclusion. Her smile is serene and profound. <-Their legacies, though separated by millennia, continue to echo in our modern world. We are, quite literally, standing on the shoulders of giants.-> She holds the gaze for a moment, letting the message resonate. The lights on the stage<Environment1> dim slightly, signaling the end of her main address. Background music: <-The orchestral music swells gently to a hopeful and uplifting crescendo, then fades out softly.->.

<User>: A young biologist discovers a rare frog species. He and his partners extracted the virus from the frog's body.

<Character1>: Young adult male, fair skin, short light brown hair, wearing a dark blue zip-up jacket over a light blue t-shirt, with a friendly and enthusiastic expression.

<Character2>: Young adult female, fair skin, long dark brown hair, wearing a white t-shirt, with a bright and confident smile.

<Environment1>: A lush, vibrant rainforest with dense foliage, towering trees, and a humid, earthy atmosphere. Sunlight filters through the canopy, creating dappled light and shadow.

<Environment2>: A cluttered yet organized research laboratory, filled with scientific equipment, microscopes, petri dishes, and monitors displaying biological data. The lighting is functional and a bit sterile.

<Frame1>: Medium shot: A young man**<Character1>** with a wide, excited smile, holding a small, brightly colored frog carefully in his cupped hands. He is surrounded by the vibrant green foliage of the rainforest**<Environment1>**.

<Video1>: The shot opens with a medium shot of **<Character1>** in the rainforest**<Environment1>**, his face beaming as he examines the unique frog. He carefully places the frog into a small, clear container. **<-This is incredible! A new species!->** he exclaims, his voice full of wonder. The camera then tracks him as he carefully makes his way through the dense undergrowth, his eyes scanning the surroundings. **<-Soft, adventurous jungle sounds with a hint of wonder->**.

<Frame2>: Close-up: A monitor screen in the research laboratory**<Environment2>** displaying complex biological data and a magnified image of the rare frog. The screen glows brightly, reflecting in an unseen window.

<Video2>: The camera transitions to a close-up of a monitor in the research laboratory**<Environment2>**, showing detailed genetic sequences of the frog. **<Character1>** enters the frame from the right, looking intently at the screen. He types rapidly on a keyboard, making notes. Suddenly, he notices a subtle anomaly in the data. **<-That's not right...->** he mutters, zooming in on a particular section of the sequence. **<-Faint, suspenseful electronic music begins->**.

<Frame3>: Medium shot: **<Character1>** in the research laboratory**<Environment2>**, looking frustrated as he points at the monitor. Various lab equipment is visible in the background, hinting at his ongoing research.

<Video3>: A medium shot shows **<Character1>** in the research laboratory**<Environment2>**, visibly frustrated. He gestures wildly at the monitor. **<-Someone tampered with my data! They've been trying to discredit my findings!->** he exclaims, his voice rising in anger. He turns from the monitor, running a hand through his hair. The camera pans slightly to show scattered research papers on his desk, emphasizing the chaos. **<-The suspenseful music grows in intensity->**.

<Frame4>: Medium shot: A young woman**<Character2>** with a confident smile, holding a tablet and looking directly at **<Character1>** in the research laboratory**<Environment2>**. She appears calm and observant.

<Video4>: The scene shifts to a medium shot in the research laboratory**<Environment2>**, where **<Character2>** enters, a calm and confident expression on her face. She approaches **<Character1>**, who looks defeated. **<-I heard about your troubles, Dr. Miles.->** she says, her voice steady and reassuring. She holds out her tablet, which displays similar biological data. **<-Perhaps I can help.->** **<Character1>** looks surprised, then intrigued. **<-The suspenseful music softens slightly, hinting at a potential alliance->**.

<Frame5>: Close-up: <Character1> and <Character2> side-by-side in the research laboratory<Environment2>, both looking intently at the tablet held by <Character2>. Their expressions are serious and focused.

<Video5>: A close-up shows <Character1> and <Character2> leaning over the tablet in the research laboratory<Environment2>, their heads close together as they analyze the data. <Character2> points to a specific section. <-This mutation signature... it's unique to a very specific environmental stressor.-> <Character1>'s eyes widen with understanding. <-So, someone introduced a pathogen to your specimen!-> he realizes. <-Precisely.-> <Character2> confirms. <-Urgent, investigative music builds.->

<Frame6>: Medium shot: <Character1> and <Character2> working together in the research laboratory<Environment2>, surrounded by equipment. <Character1> is at a microscope, while <Character2> is on a computer, both focused on their tasks.

<Video6>: The camera pulls back to a medium shot, showing <Character1> and <Character2> working in tandem in the research laboratory<Environment2>. <Character1> is hunched over a microscope, adjusting knobs, while <Character2> rapidly types on a computer, cross-referencing information. They exchange quick, focused glances. <-We need to isolate the pathogen and confirm its origin.-> <Character1> states. <-I'm pulling up all known environmental samples from the rainforest.-> <Character2> replies. <-Intense, collaborative music with a sense of urgency.->

<Frame7>: Medium shot: <Character1> and <Character2> standing triumphantly in the research laboratory<Environment2>, holding up a vial containing a clear liquid. Both have relieved smiles on their faces.

<Video7>: A medium shot captures <Character1> and <Character2> in the research laboratory<Environment2>, a sense of triumph radiating from them. <Character1> holds up a vial. <-We got it! The pathogen!-> he exclaims, a wide smile spreading across his face. <Character2> nods, a relieved grin on her face. <-And we traced its source. It was a competitor's illegal bio-s futile.-> she adds. They share a look of accomplishment. <-Uplifting, triumphant music swells.->

<User>: A jovial professor and a bright student discover a lost ancient artifact, leading them to present their findings to an eager audience.

<Character1>: A middle-aged man with short, dark brown hair, wearing glasses, a white collared shirt, and a brown suit jacket. He has a warm, inviting smile.

<Character2>: A young woman with long, dark brown hair, parted in the middle, wearing a light blue denim jacket over a patterned top. She has a bright, enthusiastic smile.

<Environment1>: A dusty, dimly lit archaeological dig site, with ancient stone walls and scattered artifacts, suggesting a sense of mystery and history.

<Environment2>: A brightly lit university lecture hall, with rows of empty seats and a large projection screen at the front, indicating a formal presentation setting.

<Frame1>: Medium shot: <Character1> stands in the dusty archaeological dig site<Environment1>, holding a small, intricate clay pot. His face is lit with a triumphant smile, and his glasses reflect a subtle gleam. Around him are ancient stone walls.

<Video1>: The shot opens with <Character1> carefully brushing dirt off an ancient pot in the archaeological dig site<Environment1>. He looks up, his eyes wide with excitement. <-I can't believe it, Maria! We found it!-> he exclaims. The camera then pans to a close-up of the pot, revealing intricate carvings. <-A lost civilization, right here!-> Background music: <-Mysterious, awe-inspiring orchestral music.->

<Frame2>: Medium shot: <Character2> is kneeling beside <Character1> in the archaeological dig site<Environment1>, her eyes sparkling with curiosity as she examines the pot. She wears a light blue denim jacket, and her long hair falls over her shoulders. Dust motes dance in the air around them.

<Video2>: Still in the archaeological dig site<Environment1>, <Character2> takes the pot gently from <Character1>, her smile radiant. She turns it over, examining the details. <-Professor, this is incredible! The symbols... they match the texts from the old scrolls!-> she says excitedly. <Character1> nods, a proud smile on his face. The camera holds on their shared moment of discovery. Background music: <-Uplifting, hopeful discovery music.->

<Frame3>: Long shot: <Character1> and <Character2> stand together at a podium in the brightly lit university lecture hall<Environment2>. <Character1> gestures enthusiastically towards a large projection screen displaying ancient symbols. <Character2> stands beside him, smiling at the audience.

<Video3>: The scene shifts to the university lecture hall<Environment2>. <Character1> is at the podium, presenting to an unseen audience. He gestures grandly at the screen, which shows images of the newly discovered artifact. <-And so, ladies and gentlemen, we unveil a piece of history previously thought lost!-> he announces, his voice booming with enthusiasm. <Character2> stands proudly beside him, occasionally adding a detail. <-The implications for understanding ancient cultures are immense,-> she adds. Background music: <-Inspiring, academic presentation music->.

<Frame4>: Close-up: <Character2> is speaking confidently into a microphone in the university lecture hall<Environment2>, her expression animated and passionate. Her long hair frames her face, and her denim jacket is neatly buttoned.

<Video4>: A close-up of <Character2> as she elaborates on their findings in the university lecture hall<Environment2>. <-This artifact not only fills a gap in our historical records but also challenges existing theories about early societal structures,-> she explains, her voice clear and articulate. The camera occasionally cuts to the rapt faces of the audience, then back to <Character2>. Background music: <-Engaging, intellectual discussion music->.

<Frame5>: Medium shot: <Character1> and <Character2> are both smiling and looking at each other in the university lecture hall<Environment2>, sharing a moment of quiet pride and satisfaction after their presentation. The lecture hall is still brightly lit.

<Video5>: After their presentation, <Character1> and <Character2> stand together in the university lecture hall<Environment2>, a sense of accomplishment in the air. <Character1> puts a hand on <Character2>'s shoulder. <-You were brilliant today, Maria,-> he says, genuinely proud. <Character2> beams. <-We make a good team, Professor,-> she replies. They exchange a warm, shared smile. Background music: <-Warm, celebratory orchestral music->.

<Frame6>: Medium shot: <Character1> and <Character2> are in the brightly lit university lecture hall<Environment2>, surrounded by congratulatory attendees. <Character1> holds a glass of champagne, smiling warmly, while <Character2> stands beside him, looking radiant and holding a small trophy. The large projection screen in the background shows a celebratory image of the artifact.

<Video6>: The scene opens in the university lecture hall<Environment2>, filled with the soft chatter of well-wishers. <Character1> raises his glass, a proud smile on his face. <-To discovery, to history, and to brilliant minds!-> he exclaims. <Character2> clinks her glass against his, her smile equally wide. <-To many more discoveries, Professors!-> she replies. Background music: <-Light, celebratory jazz music->.

<Frame7>: Close-up: The ancient clay pot, now on a display table in the university lecture hall<Environment2>, begins to glow with a faint, pulsing light. Intricate carvings on its surface seem to deepen and shift, emitting a soft hum.

<Video7>: As the camera focuses on the artifact on the display table in the university lecture hall<Environment2>, a low hum begins to emanate from it. The faint glow intensifies, casting shifting shadows on the surrounding objects. A few attendees notice the change, their chatter dying down. <-What's happening?-> someone whispers. Background music: <-Mysterious, low-frequency hum building in intensity->.

<User>: A street performer and a focused scholar cross paths in a bustling city, leading to an unexpected moment of connection.

<Character1>: A young man with dark, curly hair, a small goatee, and a brown, casual long-sleeved shirt. He has a warm, inviting smile and a lively demeanor, suggesting a free-spirited and charismatic individual.

<Character2>: A young woman with straight, shoulder-length brown hair, wearing glasses and a simple white t-shirt. She has a thoughtful and somewhat reserved expression, indicating an intelligent and studious nature.

<Environment1>: A vibrant city street during the day, bustling with pedestrians, lined with diverse architecture, and featuring hints of greenery from street trees. The atmosphere is energetic and lively, with bright, natural lighting.

<Frame1>: Medium shot: A young man **<Character1>** with a wide, infectious smile, his eyes sparkling with amusement, stands in the middle of a lively city street **<Environment1>**. He holds a brightly colored juggling prop in one hand, ready to perform. The background shows blurred city life.

<Video1>: The shot opens with a medium shot of **<Character1>**, his smile radiating warmth. He juggles three colorful balls effortlessly, moving with fluid grace. His movements are confident and engaging, drawing the attention of passersby in the bustling city street **<Environment1>**. He catches the last ball with a flourish, bowing slightly. **<Upbeat, rhythmic street music with a percussive beat>.**

<Frame2>: Medium shot: A young woman **<Character2>** with glasses, her brow slightly furrowed in concentration, walks through the busy city street **<Environment1>**. She carries a stack of books, her gaze fixed straight ahead, seemingly oblivious to the surrounding commotion. Her expression is serious and thoughtful.

<Video2>: The camera follows **<Character2>** as she navigates the crowded city street **<Environment1>**, her books held firmly. She walks with a purposeful stride, her eyes scanning something off-screen, completely absorbed in her thoughts. The vibrant street sounds and sights pass her by, but she remains lost in her own world. **<Soft, contemplative piano music begins to blend with the street sounds>.**

<Frame3>: Medium shot: **<Character1>** stands at a street corner in the city street **<Environment1>**, his smile still present but with a hint of playful anticipation. He gestures with his hands, inviting attention. In the background, **<Character2>** is just becoming visible, walking past.

<Video3>: **<Character1>** continues his performance at the street corner **<Environment1>**, now attempting a card trick with a flourish. He looks directly at the camera, then his gaze shifts slightly to the side as he notices **<Character2>** passing by. He pauses for a moment, a flicker of an idea crossing his face. **<The upbeat music softens slightly, becoming more inquisitive>.**

<Frame4>: Medium shot: **<Character2>** has stopped walking, her attention caught by **<Character1>**'s performance. She looks slightly surprised, a faint smile beginning to form on her lips as she observes him. Her books are still clutched in her hands, but her focus has shifted.

<Video4>: **<Character2>** stops abruptly, her attention finally drawn by **<Character1>**'s performance. Her initial serious expression softens, and a subtle, almost imperceptible smile plays on her lips. She watches **<Character1>** with an intrigued gaze, a momentary escape from her academic world. **<The contemplative piano music swells slightly, indicating a shift in mood>.**

<Frame5>: Medium close-up: **<Character1>** is performing a simple magic trick, making a coin disappear from his palm with a charming grin. His eyes meet **<Character2>**'s, a shared moment of connection. The bustling city street **<Environment1>** is a soft blur in the background.

<Video5>: **<Character1>** performs a quick, engaging magic trick, making a coin vanish from his hand with a wink. He looks directly at **<Character2>**, and their eyes meet. A brief, warm smile spreads across his face, and a genuine, shared moment of lightheartedness fills the air. **<A brief, playful flourish on the piano accompanies the magic trick, then returns to the soft piano music>.**

<Frame6>: Close-up: **<Character2>** laughs softly, a genuine smile now gracing her face. Her glasses are slightly askew, adding to her charm. Her eyes are bright with amusement, reflecting the unexpected joy of the moment. The city street **<Environment1>** is out of focus.

<Video6>: A close-up on **<Character2>**'s face reveals a genuine, unburdened laugh. She adjusts her glasses, her earlier seriousness completely replaced by amusement. She shakes her head slightly, a small, delightful sound. **<A light, tinkling sound effect accompanies her laugh, followed by a return to the gentle piano music, now with a slightly more hopeful tone>.**

<User>: A little boy and his mother traveled through a storybook to a fantasy world.

<Character1>: A young boy with straight, short brown hair and bright blue eyes, wearing a dark blue patterned shirt over a white undershirt. He has a curious and imaginative demeanor.

<Character2>: A woman with long, wavy blonde hair, wearing a dark top and a red headband. She has a somewhat tired but kind expression.

<Environment1>: A cozy, softly lit living room with a large, comfortable armchair, bookshelves filled with books, and a window showing a peaceful garden outside. The atmosphere is warm and inviting.

<Environment2>: A magical, dimly lit forest clearing with ancient, gnarled trees, glowing fireflies, and a faint mist swirling around. The atmosphere is mystical and enchanting.

<Frame1>: Medium shot: **<Character1>** and **<Character2>** sit together in the armchair in **<Environment1>**, an old storybook open on their laps. The boy is pointing at an illustration while the woman smiles lovingly, leaning closer.

<Video1>: The shot opens with **<Character2>** pointing excitedly at a page. **<Look, Mom! The hero is opening a magic gate!>** **<Character1>** smiles, her eyes twinkling. **<Yes, every story has a door waiting to be opened.>** The soft, warm lighting glows on their faces. **<Gentle piano music begins, evoking nostalgia and wonder.>**

<Frame2>: Wide shot: **<Character1>** and **<Character2>** are suddenly surrounded by swirling, vivid colors, the storybook's pages seem to have come alive, pulling them into a vortex of light. Both look surprised and delighted as they are drawn forward.

<Video2>: The pages of the book begin to glow. A swirl of color and light envelops them. **<What's happening, Mom?!>** the boy **<Character1>** shouts joyfully. **<Hold on!>** she laughs. The camera spins with them, as the world blurs into a rainbow vortex. **<The music swells into an orchestral crescendo of adventure.>**

<Frame3>: Medium shot: They land softly in **<Environment2>**, a misty forest filled with floating golden lights. **<Character2>** looks around in awe while **<Character1>** smiles gently, still holding his hand.

<Video3>: The camera pans through the mist, showing the magical surroundings. **<Where are we?>** the boy **<Character1>** whispers. **<Maybe... inside the story.>** **<Character1>** answers softly. **<Every story has a bit of magic, if you believe.>** **<Soft wind chimes mix with ethereal orchestral tones.>**

<Frame4>: Medium shot: **<Character2>** and **<Character1>** stand facing each other among the glowing trees of **<Environment2>**. The boy's expression is full of excitement, and she looks at him proudly.

<Video4>: **<Mom, it's just like the book!>** the boy exclaims. **<Then perhaps we're meant to finish the story together.>** she replies warmly. The camera circles them, showing the shimmering forest lights flickering around. **<The score becomes hopeful, with strings and light bells.>**

<Frame5>: Close-up: **<Character1>** leans toward **<Character2>**, both smiling as she whispers something softly. Tiny golden lights swirl around them, illuminating their faces.

<Video5>: **<Remember, stories guide us.>** **<Character2>** says gently. **<Even when they seem lost, they're waiting to be found.>** The boy nods, eyes wide with understanding. **<A tender melody plays, underscoring their bond.>**

<Frame6>: Medium shot: **<Character1>** and **<Character2>** stand before a large glowing shape, pulsing with energy in front of them, a magical doorway made of light. **<Character2>** reaches out to touch it, while **<Character1>** watches proudly.

<Video6>: **<Is this the ending?>** **<Character1>** asks. **<No,>** **<Character2>** smiles. **<It's the beginning of your own story.>** The boy touches the glowing gate, and it bursts into brilliant light. **<The music swells triumphantly.>**

<Frame7>: Close-up: **<Character1>**'s face is bathed in the light of the portal. Her expression is filled with awe and joy as she whispers softly.

<Video7>: **<Character2>** says: **<Go on, my brave explorer. Find what lies beyond.>** The light envelops them both as the scene fades to white. **<The orchestral theme resolves gently, blending warmth and wonder.>**

<User>: An old fisherman was fishing by the lake and caught a unexpected treasure.

<Character1>: An elderly man with weathered skin, a white mustache, and short dark hair partially covered by a dark blue knit beanie. He wears a dark brown padded jacket over a dark shirt.

<Environment1>: A serene riverbank at sunset, with soft, golden light filtering through sparse trees, calm water reflecting the sky, and a peaceful, natural atmosphere.

<Frame1>: Medium shot: The old man **<Character1>** is seen from the side, sitting by the riverbank **<Environment1>**. His fishing rod is propped up, and he's looking out at the calm water. The golden light of the setting sun illuminates the scene, casting long shadows.

<Video1>: The camera pans slightly to follow the old man's **<Character1>** gaze across the tranquil river **<Environment1>**. He gently reaches down and adjusts his beanie. A soft sigh escapes him. **<-It's a beautiful day, isn't it?->** he murmurs to himself. The camera holds on the serene landscape for a moment, emphasizing the peaceful end of the day. **<-The guitar music continues, becoming more reflective->**.

<Frame2>: Long shot: The old man **<Character1>** is a small figure against the vastness of the river **<Environment1>** and the colorful sunset sky. The calm water reflects the golden and orange hues of the sun. His fishing rod is still visible.

<Video2>: The camera slowly pulls back to a long shot, showing the old man **<Character1>** as a solitary figure against the stunning sunset over the river **<Environment1>**. He stands up slowly, stretching his back, and then casts a final, deliberate line from his fishing rod into the water. **<-Another day, another story to tell,->** he whispers, a hint of satisfaction in his voice. The camera focuses on the gentle ripples created by his cast. **<-The guitar music fades out slowly, replaced by the soft sounds of nature, like distant bird calls->**.

<Frame3>: Long shot: The old man **<Character1>** is walking away from the riverbank **<Environment1>**, his back to the camera, heading towards the distant trees. The sun has almost set, casting long, deep shadows. He carries a worn canvas sack over his shoulder.

<Video3>: The camera follows the old man **<Character1>** from behind as he slowly walks away from the riverbank **<Environment1>**. He hums a quiet tune to himself. Suddenly, he stumbles on an unseen root, his body lurching forward. **<-A sudden, sharp gasp from Character1->**. The camera quickly cuts to a medium shot as he falls to his knees. **<-A clattering sound as something hits the ground->**. Background music: **<-A sudden, jarring string chord followed by silence->**.

<Frame4>: Medium shot: The old man <Character1> is on his knees, looking down at the ground with a surprised expression. His sack has ripped, and several small, metallic objects are scattered around him on the riverbank <Environment1> near the water's edge. The last rays of sunlight glint off the objects.

<Video4>: The camera is now at eye level with the old man <Character1>, who is staring in disbelief at the spilled contents of his sack. He slowly reaches out a trembling hand to touch one of the objects. <-What in the...?-> he mutters, his voice raspy. The camera zooms in slightly on the objects, revealing they are old, tarnished coins and a small, intricately carved wooden box. Background music: <-Mysterious, shimmering synth pads begin to play softly->.

<Frame5>: Close-up: The old man's <Character1> weathered hands carefully pick up the small wooden box from the riverbank <Environment1>. His eyes are wide with a mixture of shock and wonder. The intricate carvings on the box are visible.

<Video5>: The camera focuses tightly on the old man's <Character1> hands as he gently picks up the wooden box. He turns it over, examining the detailed carvings. His expression shifts from surprise to a profound sense of awe. <-It can't be...-> he whispers, almost to himself. He tries to open the box, his fingers tracing the edges. Background music: <-The synth pads swell slightly, adding to the mystery->.

<Frame6>: Medium shot: The old man <Character1> is sitting cross-legged on the riverbank <Environment1>, holding the wooden box. He has successfully opened it, and a faint, ethereal glow emanates from within, illuminating his face with a soft, golden light. His eyes are fixed on the contents.

<Video6>: The camera pulls back to a medium shot, showing the old man <Character1> sitting on the ground, completely engrossed. He finally manages to pry open the wooden box. A soft, golden light spills out, casting a warm glow on his face. He peers inside, his jaw dropping. <-Incredible...-> he breathes, a tear welling in his eye. The camera slowly zooms in on his face, highlighting the mixture of wonder and disbelief. Background music: <-A gentle, ethereal choir sound subtly enters, blending with the synth pads->.

<User>: Based on the above script, continue to write the subsequent shot content.

<Frame7>: Close-up: The old man's <Character1> face, illuminated by the golden light from the box. His eyes are filled with tears of joy and astonishment, a faint smile playing on his lips. The golden light reflects in his eyes.

<Video7>: The camera holds a close-up on the old man's <Character1> face. His eyes are glistening with tears, not of sadness, but of profound happiness and wonder. He closes his eyes for a moment, taking a deep, shaky breath, then opens them again, looking at the box with renewed intensity. <-After all these years...-> he murmurs, his voice thick with emotion. Background music: <-The ethereal choir becomes more prominent, evoking a sense of long-awaited revelation->.

<User>: A man's cow was sick, so he called a veterinarian to treat it.

<Character1>: A young man, early 20s, with short brown hair and a serious, determined expression. He wears a plaid shirt under a dark grey vest, suggesting a practical, hardworking nature.

<Character2>: A young woman, early 20s, with long, wavy brown hair and a warm, empathetic smile. She wears a simple, light-colored top with a pearl necklace, conveying a gentle yet compassionate demeanor.

<Environment1>: A rustic farm setting, bathed in the warm, golden light of late afternoon. The atmosphere is initially somber but gradually shifts to hopeful. There are wooden fences, fields, and a farmhouse in the distance.

<Environment2>: A clean, well-lit veterinary clinic examination room. It has modern medical equipment, stainless steel surfaces, and a calm, professional ambiance.

<Frame1>: Medium shot: A young man<Character1> stands in a field<Environment1>, his shoulders slumped slightly, looking out at the distant farmhouse with a worried expression. The setting sun casts long shadows.

<Video1>: The shot opens with a medium shot of <Character1> in the field<Environment1>, his gaze fixed on the farmhouse. He sighs, a heavy sound. The camera slowly zooms in on his face, highlighting his concern. <-Soft, melancholic acoustic guitar music begins->.

<Frame2>: Close-up: A sick calf lies weakly on a blanket in a dimly lit pen within the farm<Environment1>. Its breathing is shallow, and its fur is matted.

<Video2>: The camera cuts to a close-up of the sick calf in its pen<Environment1>. It whimpers softly. <Character1>'s hand reaches into the frame to gently stroke the calf's head. He looks down at it with deep sadness. <-Calf whimpers softly->. <-Music becomes more somber->.

<Frame3>: Medium shot: <Character1> is talking on an old, worn phone, his brow furrowed in concern. He's standing near a barn<Environment1> door.

<Video3>: A medium shot shows <Character1> talking on the phone near the barn door<Environment1>. He listens intently, his expression shifting from worry to a hint of desperation. He finally says with a strained voice: <-We really need some help->. <-Music continues with a slightly more urgent tone->.

<Frame4>: Medium shot: A young woman<Character2> in a white veterinarian coat, holding a medical chart, smiles reassuringly at <Character1> as she stands in the examination room<Environment2>. She gestures towards a table.

<Video4>: The scene shifts to the examination room<Environment2>. A medium shot shows <Character2> smiling gently at <Character1>, holding a medical chart. She says: <-Don't worry, we'll do everything we can->. She gestures towards an examination table, inviting <Character1> to follow. <-Hopeful, light orchestral music begins->.

<Frame5>: Close-up: <Character2> gently examines the sick calf on the examination table<Environment2>, her face focused and compassionate. <Character1> watches her intently in the background, his expression a mix of anxiety and hope.

<Video5>: A close-up shows <Character2> carefully examining the calf on the table<Environment2>. She listens with a stethoscope, her movements gentle and precise. <Character1> is visible in the background, watching her every move, his hands clasped together. <-Calm, reassuring whispers from Character2->. <-Music remains hopeful, building slightly->.

<User>: A seasoned architect and a resourceful street artist discuss art.

<Character1>: A man in his late 50s, with short, neat brown hair and a clean-shaven face. He wears a dark suit, a light blue collared shirt, and a striped tie, exuding an air of professionalism and authority.

<Character2>: A young man in his late 20s, with short, messy brown hair and a neatly trimmed beard. He wears a casual striped t-shirt and a dark backpack, with a cigarette casually hanging from his mouth, giving him an artistic, rebellious vibe.

<Environment1>: A bustling city street, vibrant with street art, old buildings, and a mix of modern and classic architecture, under a bright, clear sky. The atmosphere is energetic and creative.

<Environment2>: The interior of a historical building, featuring ornate architectural details, high ceilings, and large windows, with dust motes dancing in the sunlight filtering through, creating a sense of age and grandeur.

<Frame1>: Medium shot: **<Character1>** stands confidently on a city street **<Environment1>**, holding blueprints and looking critically at a building facade. His expression is serious and focused, reflecting his professional demeanor. The street art and vibrant city life are visible in the background.

<Video1>: The shot opens with a medium shot of **<Character1>** on a bustling city street **<Environment1>**. He meticulously examines a building, then consults his blueprints with a slight frown. He adjusts his tie, a gesture of his attention to detail. **<Determined orchestral music begins, slightly formal->**

<Frame2>: Medium shot: **<Character2>** is seen spray-painting a vibrant mural on a brick wall in the city street **<Environment1>**. He has a focused, almost defiant expression, with paint smudges on his hands and clothes. His backpack is slung over one shoulder, and a few spray cans are visible near his feet.

<Video2>: The camera cuts to a medium shot of **<Character2>**, engrossed in his street art on a different part of the city street **<Environment1>**. He moves with fluid grace, applying bold strokes of color. A small crowd has gathered, admiring his work. He glances up and notices **<Character1>** observing him with a mix of curiosity and disapproval. **<Upbeat, rhythmic hip-hop music with a street art vibe starts, subtly clashing with the orchestral theme->**

<Frame3>: Close-up: **<Character1>** looks directly at **<Character2>** with a stern expression, his arms crossed. The city street **<Environment1>** is blurred in the background, emphasizing his disapproval.

<Video3>: A close-up on **<Character1>**'s face as he approaches **<Character2>**. He speaks with a firm tone: **<Excuse me, but that building is under renovation. Your unauthorized art is defacing a historical landmark->** The camera then cuts to a close-up of **<Character2>**, who meets **<Character1>**'s gaze with a challenging smirk. **<And who says I'm unauthorized? This is art!->** **<The two musical themes briefly clash, creating a dissonant feel->**

<Frame4>: Medium shot: **<Character2>** gestures emphatically towards the building's facade, explaining his artistic vision to **<Character1>**. **<Character1>** listens, initially skeptical but beginning to show a flicker of interest. They are both standing in front of the historical building **<Environment2>**'s exterior.

<Video4>: Medium shot of **<Character2>** passionately explaining his interpretation of the building's history and how his art brings new life to its facade. **<-This building has stood the test of time, but it needs a new voice. My art speaks to its soul->** **<Character1>** raises an eyebrow, listening intently, his initial disapproval softening into intrigue. **<-Intriguing...->** he murmurs. **<-The music shifts to a more neutral, inquisitive tone, blending elements of both themes->**

<Frame5>: Long shot: <Character1> and <Character2> are now inside the historical building<Environment2>. <Character1> points to an architectural detail, while <Character2> sketches in a notebook, clearly engaged. Sunlight streams through the large windows, illuminating dust motes.

<Video5>: Long shot showing <Character1> leading <Character2> into the grand interior of the historical building<Environment2>. <Character1> gestures towards an intricate archway. <-The structural integrity here is paramount. Your art must respect that.-> <Character2> nods, taking out a small sketchbook and pencil, already making notes. <-Absolutely. It's like creating a new layer over old paint.-> <-The music becomes more collaborative and exploratory, with harmonious undertones.->

<Frame6>: Medium shot: <Character1> and <Character2> are collaboratively sketching ideas on a large sheet of paper, surrounded by blueprints and art supplies within the historical building<Environment2>. They share a small smile, indicating a growing understanding and mutual respect.

<Video6>: Medium shot of <Character1> and <Character2> at a large table inside the historical building<Environment2>, now working together. <Character1> lays out architectural plans, and <Character2> sketches vibrant concepts, integrating his artistic style with the building's structure. They exchange ideas, a comfortable camaraderie forming between them. <-What if we incorporated a mural here, but shaped it around the original window frame?-> <Character1> suggests. <Character2> replies with a grin: <-Perfect. A modern classic!-> <-The music swells with a sense of creative partnership and discovery, becoming more uplifting and harmonious.->

<Frame7>: Medium shot: <Character1> and <Character2> stand in the historical building<Environment2>, their faces illuminated by sunlight streaming through a large window. <Character1> holds a rolled-up blueprint, a satisfied smile on his face, while <Character2> gestures enthusiastically towards a newly installed mural, a smudge of paint on his cheek. The ornate architectural details of the building are visible in the background, suggesting a successful renovation.

<Video7>: The shot opens with a medium shot of <Character1> and <Character2> inside the historical building<Environment2>. <Character1> proudly unfurls a blueprint, a look of accomplishment on his face. <Character2> grins, pointing to a vibrant section of the newly painted wall. <-We've truly brought this place back to life, haven't we?-> <Character1> says, a rare warmth in his voice. <Character2> nods, <-More than life, we've breathing new soul into it.-> <-Uplifting, harmonious orchestral music plays, conveying a sense of triumph and collaboration.->

<User>: A lone fisherman on a small boat casts his net into the tranquil sea, hoping for a good catch.

<Character1>: A man in his late 30s to early 40s, with a weathered face, short dark hair, and a lean build. He wears a dark, possibly leather jacket, and has a thoughtful, determined expression.

<Environment1>: A calm, open sea at dawn, with soft, golden light reflecting on the water's surface. The sky is a blend of soft oranges, pinks, and blues, indicating early morning. The overall atmosphere is peaceful and serene, with a hint of quiet anticipation.

<Frame1>: Medium shot: A man<Character1> with a weathered face and dark hair, wearing a dark jacket, stands on a small boat, gazing intently at the calm sea<Environment1>. The soft light of dawn illuminates his determined expression. A fishing net is partially visible beside him.

<Video1>: The shot opens with a medium shot of the man<Character1> on his small boat in the tranquil sea<Environment1>. He takes a deep breath, his eyes scanning the water. He then picks up a long-handled fishing net. The camera slowly zooms in on his hands as he expertly prepares the net. <-Gentle, flowing orchestral music with a hopeful undertone->.

<Frame2>: Long shot: The man<Character1> stands at the stern of his small boat, casting a wide fishing net into the calm, sun-drenched sea<Environment1>. The net spreads out gracefully against the shimmering water. The early morning light casts a soft glow over the entire scene.

<Video2>: From a long shot, the man<Character1> smoothly casts the net with a powerful, practiced motion. The net unfurls in a wide circle, creating a beautiful arc against the backdrop of the sunrise over the sea<Environment1>. He watches it descend into the water with focused patience. <-The sound of a net being cast, followed by gentle lapping of waves->. The music continues, becoming slightly more pronounced.

<Frame3>: Medium shot: The man<Character1> stands in his boat, patiently holding the rope attached to the fishing net, his gaze fixed on the water<Environment1>. His face shows a mix of anticipation and quiet determination. The golden light of dawn highlights the ripples in the water around the floating net.

<Video3>: A medium shot shows the man<Character1> patiently waiting, his hands gripping the net's rope. He leans slightly forward, his eyes never leaving the water<Environment1>. He murmurs to himself: <-Come on, big one...->. The camera pans slightly to show the net slowly sinking. <-Subtle sound of distant seabirds and the gentle creaking of the boat->. The music maintains its serene and hopeful tone.

<Frame4>: Close-up: The man's<Character1> hands tightly gripping the fishing net's rope. His knuckles are white, indicating his firm hold and anticipation. The water<Environment1> surface is visible in the background, with the net partially submerged.

<Video4>: A close-up focuses on the man's<Character1> hands, showing the tension in his grip. Suddenly, his hands begin to move, pulling the net sharply. His expression shifts to one of excitement and effort. <-A sudden splash and the straining sound of pulling a net->. The music swells slightly, indicating a moment of action.

<Frame5>: Medium shot: The man<Character1> triumphantly pulls a heavy net from the sea<Environment1>, laden with fish. His face is beaming, a wide smile replacing his earlier determination. The golden dawn light gleams off the water and the fish.

<Video5>: In a medium shot, the man<Character1> pulls the net out of the water<Environment1>, revealing a generous catch of shimmering fish. He lets out a joyful shout: <-Got 'em! Big ones!->. He lifts a fish to examine it, a wide smile spreading across his face. <-Sound of glistening fish and the man's joyful exclamation->. The music becomes more celebratory and uplifting, ending on a high note.

<Frame6>: Medium shot: The man<Character1> stands in his boat, still beaming from his catch, holding a fish. The calm sea<Environment1> stretches behind him, reflecting the soft dawn light. His expression is one of contentment and pride.

<Video6>: The shot opens with a medium shot of the man<Character1> admiring his catch. He carefully places the fish back into the net. He then begins to coil the rope, a satisfied smile on his face. <-Contented sigh from Character1->. The celebratory music from before fades into a gentle, peaceful melody. <-Sound of gentle lapping waves->.

<User>: A young musician teaches himself to play the guitar and fantasizes about performing on stage.

<Character1>: A young man with dark, curly hair, a warm smile, and an earnest expression. He wears a casual, light-colored t-shirt and has a guitar strap visible over his shoulder, suggesting he's a musician.

<Environment1>: A cozy, somewhat cluttered attic room, filled with dusty musical instruments, old records, and boxes. Soft, warm light filters in from a small window, highlighting dust motes in the air. The atmosphere is nostalgic and a bit magical.

<Environment2>: An outdoor town festival stage at dusk, illuminated by string lights. A small crowd is gathered, and the air is filled with anticipation and excitement. The atmosphere is lively and communal.

<Frame1>: Close-up: A young man **<Character1>** with a bright, hopeful expression, his eyes scanning an old, leather-bound songbook. His curly hair frames his face, and a faint dust mote dances in the soft light of the attic **<Environment1>** around him.

<Video1>: The shot opens with a close-up on **<Character1>**'s face as he meticulously turns the brittle pages of an ancient songbook in the attic **<Environment1>**. He hums softly to himself, a curious expression on his face. The camera then slowly pulls back to a medium shot, revealing him sitting on a worn rug amidst stacks of old records and instruments. He picks up a dusty acoustic guitar. **<-Soft, melancholic guitar melody begins->**

<Frame2>: Medium shot: **<Character1>** strums his guitar gently, his fingers tracing the notes in the songbook. He looks up thoughtfully, a spark of inspiration in his eyes, as if he's found something truly special. The warm, dusty light of the attic **<Environment1>** surrounds him.

<Video2>: In the attic **<Environment1>**, **<Character1>** begins to play a hauntingly beautiful melody on his guitar, his voice a soft, almost whispered recitation of the song's ancient lyrics. The camera slowly pans around him, highlighting the forgotten treasures of the room. He closes his eyes, fully absorbed in the music. **<-Character1's gentle singing and acoustic guitar playing->**. The music builds slightly in emotional intensity.

<Frame3>: Close-up: **<Character1>**'s hand, adorned with a simple ring, delicately plucking a string on his guitar. The focus is on the intricate movement of his fingers and the aged wood of the instrument, suggesting a connection to tradition and history within the cozy attic **<Environment1>**.

<Video3>: The shot focuses on **<Character1>**'s skilled fingers as they dance across the guitar strings, producing a rich, resonant sound. The camera then cuts to a close-up of his face, his eyes wide with a newfound understanding or feeling. He looks directly at the camera, a sense of wonder in his gaze. **<-The guitar melody becomes more intricate and hopeful->**. He whispers: **<-It's... magical->**

<Frame4>: Medium shot: **<Character1>** sings passionately into the microphone, his eyes closed in concentration, his voice clear and resonant. The string lights of the festival **<Environment2>** create a soft glow behind him, emphasizing the emotional depth of his performance.

<Video4>: In a medium shot, **<Character1>** begins to sing the ancient song, his voice carrying beautifully across the festival **<Environment2>** grounds. The camera slowly zooms in on his face, capturing the raw emotion in his performance. The crowd is visibly captivated, some with eyes closed, others swaying gently. **<-Character1's powerful, emotional singing, accompanied by his acoustic guitar->**. The music is a blend of the melancholic and hopeful themes from before, now with full orchestral backing.

<Frame5>: Close-up: A single tear rolls down **<Character1>**'s cheek as he finishes the song, his expression a mix of vulnerability and triumph. The bright lights of the festival **<Environment2>** reflect in his eyes, showing the depth of his connection to the music.

<Video5>: As the final note of the song fades, a close-up shows **<Character1>**'s face, a single tear tracing a path down his cheek. The crowd erupts in thunderous applause and cheers. The camera pans across the ecstatic faces of the audience members at the festival **<Environment2>**. **<-Overwhelming applause and cheers from the crowd->**. **<Character1>** bows deeply, a look of profound gratitude on his face. **<-Thank you. Thank you all->** **<-Uplifting, hopeful orchestral music swells and fades->**

<Frame6>: Close-up: A young man **<Character1>** with dark, curly hair, a warm smile, and an earnest expression. He wears a casual, light-colored t-shirt and has a guitar strap visible over his shoulder. He is looking out at the crowd with a satisfied, slightly emotional expression, still on the brightly lit stage at the town festival **<Environment2>**. The string lights twinkle softly in the background.

<Video6>: The shot opens with a close-up on **<Character1>**'s face, still flushed with the emotion of his performance. He takes a deep breath, a sense of accomplishment in his eyes. The camera slowly pulls back to a medium shot, showing him looking out at the now dispersing crowd at the festival **<Environment2>**. He smiles, waving a hand. **<-Fading applause and murmurs of the crowd->**. He begins to lower his guitar. **<-Thank you for listening->**
